

HOW TO LEARN ANYTHING FASTER?

STOP MULTITASKING

Multitasking causes new information to go to the wrong part of our brain. Moving back and forth between task wastes productivity as our brain can't pay attention to multiple tasks at the same time.

DON'T REINVENT THE WHEEL

Find someone who already master the skills you are willing to learn and model the path they already followed. This way you can learn new things in a shorter period of time.

LET YOUR MIND WANDER

Schedule some quality time to let your mind wander, as healthy breaks allow your brain to rest and avoid creative blocks. Going for a walk or having a long bath are some good examples of mind-wandering.

REPETITION, REPETITION, REPETITION...

The more attempts you make to learn something, the more the brain reinforces the necessary skills until you can do it subconsciously.

RELATE NEW LEARNING TO PRIOR KNOWLEDGE

Allowing your brain to create connections between new information and what you already know will help you remember it later.

The Popper-Carnap Controversy Alex C. Michalos, 2012-12-06 1 In 1954 Karl Popper published an article attempting to show that the identification of the quantitative concept degree of confirmation with the quantitative concept degree of probability is a serious error The error was presumably committed by J M Keynes H Reichenbach and R Carnap 2 It was Popper's intention then to expose the error and to introduce an explicatum for the prescientific concept of degree of confirmation A few months later Y Bar Hillel published an article attempting to show that no serious error had been committed particularly by Carnap and that the problem introduced by Popper was simply a verbal one 3 Popper replied immediately that Dr Bar Hillel forces me Popper now to criticize Carnap's theory further and he Popper introduced further objections which if accepted destroy Carnap's theory 4 About eight years after this exchange took place I was in graduate school at the University of Chicago in search of a topic for a doctoral dissertation An investigation of the issues involved in this exchange seemed to be ideal for me because I had and still have a great admiration for the work of both Carnap and Popper A thoroughly revised and I hope improved account of that investigation appears in the first five chapters of this book Put very briefly what I found were four main points of contention
