How To Document Wounds:

Planning Your Research and How to Write It Aziz Nather, 2015-10-21 This book is a practical guide for residents and young researchers who are planning to embark on research. It details the significant planning one must first do including choosing a suitable experienced clinician as a supervisor, sourcing for a winning idea with significant clinical impact, performing a proper review of literature, defining clearly the objectives to be set and adopting the appropriate methodology. Statistical evaluation must be done from the start of the research to define adequate sample size and also for evaluation of the results. It also advises how one should draw upon relevant and appropriate conclusions from the results obtained. The ethics of research is also discussed. An all important factor in research is the procurement of research grants. Readers are guided how to write a proper research proposal to secure these much needed grants. Many research papers end up as presentations only in local or international conferences. An important additional objective of this book is to guide young researchers how to write their finished product as a publication in an important international refereed journal or as a thesis. Chapters have been specially written with tips for scientific writing, selecting the right journal, writing for an original article for a journal, a review article, a case report as well as for a thesis. Tips are also written on what reviewers of a journal look for in an article as well as what examiners look for in a thesis.

The Care of Wounds Carol Dealey, 2008-04-15 Care of Wounds addresses all aspects of holistic wound care management. The third edition of this successful text continues to reflect current research and evidence based practice while incorporating the considerable developments which have occurred in wound care practice since the publication of the second edition. The third edition includes new chapters on evidence based wound care and the organisation of wound management together with new material on nurse prescribing and the management of wounds in the community, the development of nurse led ulcer clinics and specialist wound management centres, details of new technologies and the use of pressure redistributing equipment. Although principally written for nurses, it is of value to all healthcare professionals working in the field of wound healing.

Advanced Practitioner Terry Swanson, Margo Asimus, Bill McGuiness, 2014-10-21 Increasingly wound management is recognised as a specialised area of practice. Advances in wound care products, surgical interventions and social support options create an often bewildering array of knowledge for healthcare practitioners. This textbook opens with a focus on the core elements of effective wound management: an understanding of how wounds heal and what inhibits wound healing; rigorous assessment; use of outcome measures; evidence-based approaches to practice; and an understanding of how clinical research is done. Key aspects of wound bed preparation and management, diagnostic investigations, assessment and management of non-viable tissue, infected wounds, dressings and technology, pharmacological therapy and acute wounds are then elucidated. Optimal management of commonly encountered wounds: venous leg ulceration, arterial and mixed arterial venous ulceration, inflammatory ulcers, pressure injury and the high-risk foot and unusual wounds is described. The path to professionalisation of wound management in Australia is charted. The book ends with a list of wound care products, types, properties, uses, distributor contact details. The editors and specialist contributors to this text have aimed to build on the foundations provided by the numerous basic introductory level textbooks in the field to provide an authoritative, comprehensive and up-to-date textbook for wound managers who wish to further develop their knowledge and skills.

Acute and Chronic Wounds Ruth Bryant, Denise Nix, 2015-11-24 Prevent and manage wounds with this expert, all-inclusive resource. Acute: the comprehensive approach includes the latest advances in diagnosis, differentiation of wound types, nutrition, prevention, treatment and pharmacology. Self-assessment questions and answers in each chapter help you assess your knowledge and prepare for all wound certification exams. Checklists offer a concise, easy-to-read summary of the steps needed to achieve the best patient care outcomes. Risk assessment scales help in determining a patient's risk for developing a wound and wound classification tools identify the proper terminology to be used in documentation. Learning objectives at the beginning of each chapter focus your study on the most important content. Principles for practice development boost outcomes and productivity in agencies and institutions: home care, acute care, long-term care and long-term acute care settings. NEW coverage includes the latest guidelines from WOCN, AAWC, NPUAP, EPUAP and PPPIA and the American College of Physicians. New sections cover the prevention and management of biofilm, the new skin tear classification system, MASD and MARCI, CTP terminology and classification scheme and integration of the Health Belief Model. NEW! Additional full-color photographs show the differential diagnosis of types of skin damage, management of fistulas and NPWT procedures. NEW! Clinical Consult features help in applying concepts to clinical practice, showing students and health care professionals how to assess, manage and document real-life patient and staff encounters using the ADPIE framework. NEW! Two color illustrations and design make the book more visually appealing.
