

Individual Decision-Making and Argument

Topic: Sociology | Words: 1649 | Pages: 4

Complex processes, structures, and environmental interactions characterize contemporary institutions and organizations. One challenge economists, analysts, and marketers face is understanding the decision-making process. Likewise, scholars have shown increased interest in understanding decision-making outcomes to make better theoretical predictions, develop effective strategies, and suggest better public policies (Jiménez & Brocos, 2021). Consider behavioral complexities of the business context, in which people are situated, are reflected in their decision-making and behavioral mechanisms. In this sense, individual decision compromises different selves in a complex context. For example, senior management often considers the company's needs, available resources, staff capabilities, and the company's vision, mission, and environment while making a corporate decision. The processes entailed in decision-making involve cognitive processes underlying arguments and choices.

Interpersonal Theories

The Naïve Scientist and Attribution Approach

Social cognition broadly describes how people process, encode and use information to make sense of others' behavior in social contexts. How a person organizes and uses social information is crucial in understanding personal and group processes, conformity, and social identity. Humans are rational and can solve complex problems using sophisticated logic to develop solutions and construct arguments (McAlaney & Benson, 2020). Therefore, people apply these principles in everyday activities and social

Joonhong Ahn,Franck Guarnieri,Kazuo Furuta,2017-08-15 This book is published open access under a CC BY 4 0 license This book summarizes presentations and discussions from the two day international workshop held at UC Berkeley in March 2015 and derives questions to be addressed in multi disciplinary research toward a new paradigm of nuclear safety The consequences of the Fukushima Daiichi nuclear accident in March 2011 have fuelled the debate on nuclear safety while there were no casualties due to radiation there was substantial damage to local communities The lack of common understanding of

the basics of environmental and radiological sciences has made it difficult for stakeholders to develop effective strategies to accelerate recovery and this is compounded by a lack of effective decision making due to the eroded public trust in the government and operators Recognizing that making a society resilient and achieving higher levels of safety relies on public participation in and feedback on decision making the book focuses on risk perception and mitigation in its discussion of the development of resilient communities

Decision Economics: Minds, Machines, and their Society Edgardo Bucciarelli,Shu-Heng Chen,Juan M. Corchado,Javier Parra D.,2021-08-16 This book is the result of a multi year research project led and sponsored by the University of Chieti Pescara National Chengchi University University of Salamanca and Osaka University It is the fifth volume to emerge from that international project held under the aegis of the United Nations Academic Impact in 2020 All the essays in this volume were virtually discussed at the University of L Aquila as the venue of the 2nd International Conference on Decision Economics a three day global gathering of approximately one hundred scholars

and practitioners and were subjected to thorough peer review by leading experts in the field. The essays reflect the extent, diversity, and richness of several research areas, both normative and descriptive, and are an invaluable resource for graduate-level and PhD students, academics, researchers, policymakers, and other professionals, especially in the social and cognitive sciences. Given its interdisciplinary scope, the book subsequently delivers new approaches on how to contribute to the future of economics, providing alternative explanations for various socio-economic issues such as computable humanities, cognitive behavioural, and experimental perspectives in economics, data analysis, and machine learning, as well as research areas at the intersection of computer science, artificial intelligence, mathematics, and statistics, agent-based modelling, and the related. The editors are grateful to the scientific committee for its continuous support throughout the research project, as well as to the many participants for their insightful comments and always probing questions. In any case, the collaboration involved in the project extends far beyond the group of authors published in this volume and is reflected in the quality of the essays published over the years.

Citation Classics from the Journal of Business Ethics Alex C. Michalos, Deborah C Poff, 2012-08-01. The Journal of Business Ethics was founded by Alex C Michalos and Deborah C Poff and published its first issue in March 1982. It is the most frequently cited business ethics journal in the world. The Journal has always offered a multidisciplinary and international public forum for the discussion of issues concerning the interaction of successful business and moral virtue. Its authors and readers are primarily scholars and students in social sciences and philosophy with special interests in the interaction of these disciplines with business or corporate responsibility. Since the field of business ethics grew simultaneously with the growth of the Journal, a collection of its most cited articles is tantamount to a collection of the articles that had the greatest influence in defining the field over its first 30 years of development. In this anniversary volume, an overview of citation classics from the Journal is presented; the 33 most frequently cited articles are reproduced, and brief reflections on the impact of the Journal on the field are given from over 100 scholars who authored citation classics and/or distinguished papers, as well as those who served on the Editorial Board and/or are recognized as leaders in the field.

Balanced Sustainability In A Changing World Ernst Poppel, Maria Reinisch, 2023-08-30. The Federation of German Scientists together with the Institute of Medical Psychology, Ludwig Maximilian University, organized an interdisciplinary and international autumn school in 2023 when 30 young researchers and students participated. This important volume comprises lectures presented by international leading scientists and prominent experts from different academic fields who provided the background knowledge for balanced sustainability in a changing world. Topics selected in the first block of lectures focused on climate change and biodiversity. And in the second block, lectures were given on social and personal challenges in a changing world: How should smart cities be organized in the future, and how a successful urban transformation can be managed? Then it was explained how a neuropolitical approach to humanization can help to overcome polarization in countries. The aspect of a necessary social togetherness was addressed in the third block with an example from Nepal and

beyond Finally in a fourth block questions of peace and intercultural spirit were evaluated How can we reach and maintain equanimity in a changing world How can peace be obtained All these lectures were followed by intense discussions with the students and their questions reflect the interdisciplinary background of the participants It is hoped that the pragmatic suggestions from the participants of this autumn school will provide inspiration in finding solutions for imminent global and local problems
