Asian Forms of the Nation Stein Tonnesson,Hans Antlov,2013-10-23 The general tendency among theorists in nationalism and national identity has been to assume that the modernization process in Asia and Africa is a kind of distorted reflection of

a Western precedent Asian forms of the nation have rarely been seen as independent alternative models Among today s leading theoreticians there is a growing tendency to take Asia seriously and to include Asian examples in the general discussion The aim of the present collection is to build on and reinforce this tendency It does not postulate any specifically Asian form of the nation as opposed to a Western one Rather it seeks to demonstrate that in Asia as well as in Europe each nation forms a unique amalgam which can be compared fruitfully with others History culture and geography have posed various kinds of limits to what can be imagined as Benedict Anderson puts it The relationship between geographical space and national construction is explored in depth here

Dividing the Nile David E. Mills,2014-12-01 Most scholarship has attributed Sudanese independence in 1956 to British dominance of the Condominium historical animosity toward Egypt or the emergence of Sudanese nationalism Dividing the Nile counters that Egyptian entrepreneurs failed to develop a united economy or shared economic interests guaranteeing Egypt s loss of the Sudan It argues that British dominance of the Condominium may have stymied initial Egyptian efforts but that after the First World War Egypt became increasingly interested in and capable of economic ventures in the Sudan However early Egyptian financial assistance and the seemingly successful resolution of Nile waters disputes actually divided the regions while later concerted efforts to promote commerce and acquire Sudanese lands failed dismally Egyptian nationalists simply missed opportunities of aligning their economic future with that of their Sudanese brethren resulting in a divided Nile valley Dividing the Nile will appeal to historians social scientists and international relations theorists among those interested in Nile valley developments but its focused economic analysis will also contribute to broader scholarship on nationalism and nationalist theory
