English and freshly adapted as the acclaimed documentary Burning Out Pascal Chabot s polemic treatise Global Burnout takes the phenomenon we call burnout as not just an individual problem that affects a few exhausted people but rather a disease of civilization connected to concepts of progress technology and desire which are the hallmarks of this era of experimentation First analysing the archaeology of the concept Chabot distinguishes three main types of burnout the first specific to professions who help others appears to be the exhaustion of their humanism the second a trouble of adaptation and perfectionism and the third which is a consequence of the struggle for recognition The philosophical implications of each of these three states is identified allowing Chabot to buck the trend towards a negative nearly fatalistic outlook something not surprising considering the intrinsic gravity of the subject matter An excellent story teller as well as an adequate elaborater of complex theories Chabot s Global Burnout presents an introduction to the topic and therapy for the modern reader □□□□(□□□□□□□□□□) Allen Hatcher,2005 **Think Perl 6** Laurent Rosenfeld,Allen B.
