Shingareva, Carlos Lizárraga-Celaya, 2010-04-29 In the history of mathematics there are many situations in which calculations were performed incorrectly for important practical applications Let us look at some examples the history of computing the number began in Egypt and Babylon about 2000 years BC since then many mathematicians have calculated e.g. Archimedes Ptolemy Viète etc The first formula for computing decimal digits of e was discovered by J. Machin in 1706 who was the first to correctly compute 100 digits of e Then many people used his method e.g. W. Shanks calculated with 707 digits within 15 years although due to mistakes only the first 527 were correct For the next examples we can mention the history of computing the ne structure constant that was first discovered by A. Sommerfeld and the mathematical tables exact calculations and formulas published in many mathematical textbooks were not verified rigorously 25 These errors could have a large effect on results obtained by engineers But sometimes the solution of such problems required such technology that was not available at that time In modern mathematics there exist computers that can perform various mathematical operations for which humans are incapable Therefore the computers can be used to verify the results obtained by humans to discover new results to prove the results that a human can obtain without any technology With respect to our example of computing we can mention that recently in 2002 Y. Kanada, Y. Ushiro, H. Kuroda and M. *Martin Heidegger and the Truth About the Black Notebooks* Friedrich-Wilhelm von Herrmann, Francesco Alfieri, 2022-01-01 Toward the beginning of

2013 I received reports of passages in the Black Notebooks that offered observations on Jewry or as the case may be world Jewry. It immediately became clear to me that the publication of the Black Notebooks would call forth a wide spread international debate. Already in the Spring of 2013 I had asked Professor Friedrich Wilhelm von Herrmann last private assistant and in the words of my grandfather the chief co worker of the complete edition if he might review the Notebooks as a whole based on his profound insight into the thought of Martin Heidegger and in particular review those Jewish related passages that were the focus of the public eye. Publications about the Black Notebooks quickly came to propagate catchy expressions such as being historical anti-Semitism and metaphysical anti-Semitism. The first question that obviously arises is: Does the thought of Martin Heidegger exhibit any kind of anti-Semitism at all? In this book Professor von Herrmann now advances his hermeneutic explication. With Professor Francesco Alfieri of the Pontificia Universit Lateranense he has found a colleague who has drawn up a comprehensive philological analysis of volumes GA 94 through GA 97 of the Complete Edition. The fact that Heidegger designated the hitherto published black notebooks as Ponderings *berlegungen* and as Observations *Anmerkungen* has been given little consideration. He intentionally placed them at the conclusion of the Complete Edition because without acquaintance with the lectures and above all with the being historical treatises that would come to be published in the framework of the Complete Edition they would not be comprehensible. This volume presents political phenomenology as a new specialty in western philosophical and political thought that is post-classical, post-Machiavellian and post-behavioral. It draws on history and sets the agenda for future explorations of political issues. It discloses crossroads between ethics and politics and explores border crossing issues. All the essays in this volume challenge existing ideas of politics significantly. As such they open new ways for further explorations by future generations of phenomenologists and non-phenomenologists alike. Moreover, the comprehensive chronological bibliography is unprecedented and provides not only an excellent picture of what phenomenologists have already done but also a guide for the future. **Sheridan improved.
