Adu, 2024-02-23 There are essential questions surrounding Africa's digitalization journey including whether or not the continent can truly serve as the last frontier for socio economic transformation through digital innovation An examination of countries such as Ghana Kenya Senegal and Rwanda which are actively pursuing digitalization may provide some answers To

evaluate the potential implications both real and potential that arise from this focused pursuit a critical analysis is necessary. Scrutiny of digital infrastructure by companies like Huawei, the emergence of artificial intelligence and the advent of quantum computing will open new pathways to understanding and establishing promising approaches to the advancement of this region. Examining the Rapid Advance of Digital Technology in Africa offers a comprehensive exploration of the transformative power of digitalization in Africa and its implications for the continent's socio-economic development. It engages with the field of science and technology studies, linking it with socio-economic impacts and transformation to track, analyze, understand, and critique Africa's contributions to digitalization. The chapters cover a wide range of themes, including ICTs and the business environment, education, healthcare, creative industries, media, culture, tourism, agriculture, ecology, artificial intelligence, blockchain, and cryptocurrency, revolution, algorithmic governance, the quantum age, and urbanization. This book is a must-read for researchers, scholars, investors, and policymakers who are interested in Africa's digital transformation, as it offers valuable insights into the latest empirical and theoretical aspects shaping the continent's ongoing digitalization.

**The Evolving Landscape of Ethical Digital Technology** Simon Rogerson, 2021-09-16

In a world that is awash in ubiquitous technology, even the least tech-savvy know that we must take care how that technology affects individuals and society. That governments and organizations around the world now focus on these issues, that universities and research institutes in many different languages dedicate significant resources to study the issues, and that international professional organizations have adopted standards and directed resources toward ethical issues in technology is in no small part the result of the work of Simon Rogerson. Chuck Huff, Professor of Social Psychology at Saint Olaf College, Northfield, Minnesota, in 1995, Apple launched its first WWW server, QuickTime Online. It was the year Microsoft released Internet Explorer and sold 7 million copies of Windows 95 in just 2 months. In March 1995, the author Simon Rogerson opened the first ETHICOMP conference with these words: "We live in a turbulent society where there is social, political, economic, and technological turbulence; it is causing a vast amount of restructuring within all these organisations, which impacts on individuals, which impacts on the way departments are set up, organisational hierarchies, job content, span of control, social interaction, and so on, and so forth. Information is very much the fuel of modern technological change. Almost anything now can be represented by the technology and transported to somewhere else. It's a situation where the more information a computer can process, the more of the world it can actually turn into information. That may well be very exciting, but it is also very concerning." That could be describing today. More than 25 years later, these issues are still at the forefront of how ethical digital technology can be developed and utilised. This book is an anthology of the author's work over the past 25 years of pioneering research in digital ethics. It is structured into five themes: Journey, Process, Product, Future, and Education. Each theme commences with an introductory explanation of the papers, their relevance, and their interrelationship. The anthology finishes with a concluding chapter which summarises the key messages and suggests what might happen in the future.

Included in this chapter are insights from some younger leading academics who are part of the community charged with ensuring that ethical digital technology is realised
