Cyber Security and Global Information Assurance: Threat Analysis and Response Solutions Knapp, Kenneth J., 2009-04-30. This book provides a valuable resource by addressing the most pressing issues facing cyber security from both a national and global perspective. Provided by publisher **Security Culture** Hilary Walton, 2016-04-01. Security Culture starts from the premise that even with good technical tools and security processes, an organisation is still vulnerable without a strong culture and a resilient set of behaviours in relation to people risk. Hilary Walton combines her research and her unique work portfolio to provide proven security culture strategies with practical advice on their implementation. And she does so across the board from management buy-in, employee development and motivation right through to effective metrics for security culture activities. There is still relatively little integrated and structured advice on how you can embed security in the culture of your organisation. Hilary Walton draws all the best ideas together, including a blend of psychology, risk, and security, to offer a security culture interventions toolkit from which you can pick and choose as you design your security culture programme, whether in private or public settings. Applying the techniques included in Security Culture will enable you to introduce or enhance a culture in which security messages stick, employees comply with policies, security complacency is challenged, and managers and employees understand the significance of this critically important business as usual function. Internet and Intranet Security Management: Risks and Solutions Janczewski, Lech, 1999-07-01. In the last 12 years, we have observed amazing growth of electronic communication. From typical local networks through countrywide systems and business-based distributed processing, we have witnessed widespread implementation of computer-controlled transmissions encompassing almost every aspect of our business and private lives. Internet and Intranet Security Management: Risks and Solutions addresses issues of information security from the managerial/global point of view. The global approach allows us to concentrate on issues that could be influenced by activities happening on opposite sides of the globe. Toward a Quantum-Safe Communication Infrastructure Rainer Steinwandt, A. Xuereb, 2024-03-05. The accelerating pace at which quantum computing is developing makes it almost inevitable that some of the major cryptographic algorithms and protocols we rely on daily for everything from internet shopping to running our critical infrastructure may be compromised in the coming years. This book presents 11 papers from the NATO Advanced Research Workshop ARW on Quantum and Post Quantum Cryptography hosted in Malta in November 2021. The workshop set out to understand and reconcile two seemingly divergent points of view on post quantum cryptography and secure communication: would it be better to deploy post quantum cryptographic PQC algorithms or quantum key distribution QKD? The workshop brought these two communities together to work towards a future in which the

two technologies are seen as complementary solutions to secure communication systems at both a hardware QKD and software PQC level rather than being in competition with each other Subjects include the education of an adequate workforce and the challenges of adjusting university curricula for the quantum age whether PQC and QKD are both required to enable a quantum safe future and the case for hybrid approaches and technical aspects of implementing quantum secure communication systems The efforts of two NATO nations to address the possible emergence of cryptanalytically relevant quantum computers are explored as are two cryptographic applications which go beyond the basic goal of securing two party communication in a post quantum world The book includes economic and broader societal perspectives as well as the strictly technical and adds a helpful new contribution to this conversation **Moving Beyond the First Five Years** United States.
