**2016** World Bank Group,2016-01-14 Digital technologies are spreading rapidly but digital dividends the broader benefits of faster growth more jobs and better services are not If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone why can t others around the world do the same If 8 million entrepreneurs in China one third of them women can use an e commerce platform to export goods to 120 countries why can t entrepreneurs elsewhere achieve the same global reach And if India can provide unique digital identification to 1 billion people in five years and thereby reduce corruption by billions of dollars why can t other countries replicate its success Indeed what s holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver Two main reasons First nearly 60 percent of the world s population are still offline and can t participate in the digital economy in any meaningful way Second and more important the benefits of digital technologies can be offset by growing risks Startups can disrupt incumbents but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms Employment opportunities may be greater but not when the labor market is polarized The internet can be a platform for universal empowerment but not when it becomes a tool for state control and elite capture The World Development Report 2016 shows that while the digital revolution has forged ahead its analog complements the regulations that promote entry and competition the skills that enable workers to access and then leverage the new economy and the institutions that are accountable to citizens have not kept pace And when these analog complements to digital investments are absent the development impact can be disappointing What then should countries do They should formulate digital development strategies that are much broader than current information and communication technology ICT strategies They should create

a policy and institutional environment for technology that fosters the greatest benefits In short they need to build a strong analog foundation to deliver digital dividends to everyone everywhere ECIME2015-9th European Conference on IS Management and Evaluation Dr Elias Pimenidis and Dr Mohammed Odeh,2015-09-07 The 9th European Conference on Information Management and Evaluation ECIME is being hosted this year by the University of the West of England Bristol UK on the 21 22 September 2015 The Conference Chair is Dr Elias Pimenidis and the Programme Chair is Dr Mohammed Odeh both from the host University ECIME provides an opportunity for individuals researching and working in the broad field of information systems management including IT evaluation to come together to exchange ideas and discuss current research in the field This has developed into a particularly important forum for the present era where the modern challenges of managing information and evaluating the effectiveness of related technologies are constantly evolving in the world of Big Data and Cloud Computing We hope that this year s conference will provide you with plenty of opportunities to share your expertise with colleagues from around the world The keynote speakers for the Conference are Professor Haris Mouratidis from the School of Computing Engineering and Mathematics University of Brighton UK who will address the topic Rethinking Information Systems Security Dr Mohammed Odeh from the University of the West of England Bristol UK and Dr Mario Kossmann from Airbus UK who will talk about The Significance of Information Systems Management and Evaluation in the Aerospace Industry ECIME 2015 received an initial submission of 55 abstracts After the double blind peer review process 28 academic Research papers 5 PhD Research papers 1 Masters Research paper and 3 Work in Progress papers have been accepted for these Conference Proceedings These papers represent research from around the world including Austria Botswana Cyprus Czech Republic Ireland Japan Kuwait New Zealand Norway Poland Portugal Slovakia Russia South Africa South Korea Sweden The Netherlands UK and the USA **Handbook of Research on Enhancing Teacher Education**
