International Trade Theory and Policy Giancarlo Gandolfo, 2013-08-13 In the present text the author deals with both conventional and new approaches to trade theory and policy treating all important research topics in international economics and clarifying their mathematical intricacies The textbook is intended for undergraduates graduates and researchers alike It addresses undergraduate students with extremely clear language and illustrations making even the most complex trade models accessible In the appendices graduate students and researchers will find self contained treatments in mathematical terms The new edition has been thoroughly revised and updated to reflect the latest research on international trade

Global Imperialism and the Great Crisis Ernesto Screpanti, 2014 In this provocative study economist Ernesto Screpanti argues that imperialism OCofar from disappearing or mutating into a benign OC globalization OCOOCohas in fact entered a new phase which he terms OC global imperialism OCO This is a phase defined by multinational firms cut loose from the nation state framework and free to chase profits over the entire surface of the globe No longer dependent on nation states for building a political consensus that accommodates capital accumulation these firms seek to bend governments to their will and destroy barriers to the free movement of capital And while military force continues to play an important role in imperial strategy it is the discipline of the global market that keeps workers in check by pitting them against each other no matter what their national origin This is a world in which the so called OC labor aristocraciesOCO of the rich nations are demolished the power of states to enforce checks on capital is sapped and global firms are free to pursue their monomaniacal quest for profits unfettered by national allegiance Screpanti delves into the inner workings of global imperialism explaining how it is different from past forms of imperialism how the global distribution of wages is changing and why multinational firms have strained to break free of national markets He sees global imperialism as a developing process one with no certain outcome But one thing is clear when economic crises become opportunities to discipline workers and when economic policies are imposed through

increasingly authoritarian measures the vision of a democratic and humane world is what is ultimately at stake
