Parameter Theory and Linguistic Change Charlotte Galves, Sonia Cyrino, Ruth Lopes, Filomena Sandalo, Juanito Avelar, 2012-11-01 This book focuses on some of the most important issues in historical syntax. In a series of close examinations of languages from old Egyptian to modern Afrikaans, leading scholars present new work on Afro-Asiatic, Latin and Romance, Germanic, Albanian, Celtic, Indo-Iranian and Japanese. The book revolves around the linked themes of parametric theory and the dynamics of language change. The former is a key element in the search for explanatory adequacy in historical syntax; if the notion of imperfect learning, for example, explains a large element of grammatical change, it is vital to understand how parameters are set in language acquisition and how they might have been set differently in previous generations. The authors test particular hypotheses against data from different times and places with the aim of understanding the relationship between language variation and the dynamics of change. Is it possible, for example, to reconcile the unidirectionality of change predominantly expressed in the phenomenon of grammaticalization with the multidirectionality predicted by generativist approaches? In terms of the richness of the data it examines, the broad range of languages it

discusses and the use it makes of linguistic theory this is an outstanding book not least in the contribution it makes to the understanding of language change *Bibliografia brasileira* ,1995 O Ser Humano e o Ambiente Ana Lúcia Brandimarte,Déborah Yara Alves Cursino dos Santos,2019-05-14 O livro O ser humano e o ambiente objetiva introduzir a problemática do crescimento e adensamento populacional humano frente escassez de recursos a partir de uma perspectiva histórica utilizando uma linguagem acessível a graduandos de cursos de Ciências Biológicas Engenharias Ambiental e Florestal e Gestão Ambiental professores de ensino básico e demais interessados nessa temática que procuram uma visão básica sobre questões ambientais Entre os principais temas tratados está o crescimento populacional humano como causa e consequência dos padrões de consumo de energia e recursos e suas relações com a utilização de combustíveis fósseis e recursos renováveis como fonte de energia São abordados temas como agricultura ambientes urbanos qualidade e disponibilidade de água mudanças climáticas capacidade de suporte do planeta e pegada ecológica humana e por fim suas relações com desenvolvimento sustentável e uso e conservação dos recursos naturais Apesar de ser fortemente embasada em aspectos ambientais a obra não deixa de lado relevantes questões sociais e econômicas associadas aos temas tratados *Manual de Direito do Trabalho e de Processo do Trabalho - 11ª Edição* Paula Quintas,Hélder Quintas,2023-06-26 Na presente edição procuramos essencialmente incorporar as alterações introduzidas pela Lei nº 13.202/2023 de 03 de abril entretanto retificada pela Declaração de Retificação nº 13.202/2023 de 29 de maio Aproveitamos ainda para melhorar a exposição de certos regimes renovar a jurisprudência e adaptar as minutas ao novo quadro legal
