INTRODUCTION

A flight management system (FMS) or a flight management computer (FMC) is a function module computer part of a system which, as an FMS, is a specialized computer system that automates a wide variety of in-flight tasks, reducing the workload on the flight crew to the point that during long haul flight operations a pilot who flies on a much go into a comfortable sleep.

A primary function is flight management of the flight plan. Using various sensors such as GPS and IRS to determine the aircraft's current and predicted position in the world. The FMS is externally controlled through a Control Display Unit (CDU) which incorporates a small screen and keyboard. The FMS also sends the required flight plan data to other instruments such as the PFD for better awareness.
