Manual Stress Scale:

Life Stress Scale and Scoring Manual, Second Revision, 30 and 42 Months Byron Egeland, 1998 **Assessment Scales in Depression and Anxiety - CORPORATE** Raymond W. Lam, Erin E. Michalaak, Richard P. Swinson, 2006-08-08 There are a number of books recently published on assessment scales for depression and anxiety. However, these books are generally more detailed than clinicians require, are specific to one or other condition, or involve specialty populations such as children or geriatrics. To meet the needs of clinicians treating patients with depressive and anxiety disorders, this volume aims to bring together empirically validated assessment scales. In a concise and user-friendly format, *Assessment Scales in Depression and Anxiety* illustrates the assessment scales used in clinical trials and research studies, shows how to select an assessment scale, and to decide which scale to use for a particular clinical situation, and provides sample assessment scales for clinicians to use in their practice.

Clinical Assessment and Diagnosis in Social Work Practice Jacqueline Corcoran, Joseph Walsh, 2006-02-09 Guides social workers in developing competence in the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders DSM-IV-TR system of diagnosis and assists them in staying attuned during client assessment to social work values and principles. Provided by publisher.

Practitioner's Guide to Empirically Based Measures of Anxiety Martin M. Antony, Susan M. Orsillo, Lizabeth Roemer, 2006-04-10 This volume provides a single resource that contains information on almost all of the measures that have demonstrated usefulness in measuring the presence and severity of anxiety and related disorders. It includes reviews of more than 200 instruments for measuring anxiety-related constructs in adults. These measures are summarized in quick-view grids which clinicians will find invaluable. Seventy-five of the most popular instruments are reprinted, and a glossary of frequently used terms is provided.

A Compendium of Psychosocial Measures Dale Johnson, 2009-09-22 Dale Johnson brings a rare and unique assortment of skills to this enterprise; he has personally been immersed in the world of severe mental illness for many years and adds a compendium of appropriate tools for the research community. Harriet P. Lefley, PhD, University of Miami School of Medicine. From the Foreword: This book discusses the rationale for the selection of psychosocial measures used to assess adults with serious mental illnesses. The chapters examine the use and efficiency of various measurement tools that intend to evaluate diagnostic and functional specificity, life stressors, supportive resources, quality of life, and more. The text also analyzes external factors that are vital to clients' clinical progress and continuing community tenure, such as continuity of care, housing, resources, and family measures. Key Features: Presents the purpose of each measurement tool, the description, psychometric properties, reliability, validity, and usage guidelines in template format. Includes measurement tools for functional assessment, community living, social problem solving, and coping, agency performance evaluation, and more. Contains research on treatment adherence, consumer satisfaction with mental health services, and feelings of empowerment. Evaluates the functioning and productivity of treatment and rehabilitation centers. This is the ideal tool for clinicians, psychiatrists,

rehabilitation professionals and other mental health professionals working with the mentally ill in hospital or community health settings
