control lever to neutral. If the operator chooses not to use the detent positions, the allen screw that pressurizes the detent spring, see Fig. 17, can be backed off, making the detents inoperative.

CYLINDER FLOTATION

To float an external hydraulic cylinder (single or double-acting), turn the switch valve, No. 1, Fig. 14, fully out and move the valve spool control lever to the detent "drop" position. The cylinder will be allowed to extend or retract freely, allowing the implement to follow ground undulations.

LOCK-OUT AND VARIABLE DROP CARTRIDGE (Accessory)

The lock-out and variable drop cartridge is available as an accessory for installation in the single-spool double-acting valve.

The cartridge serves two purposes: it acts as a positive check valve on the lift side of the cylinder to provide accuracy in maintaining cylinder position, as well as providing the operator a physical means of selecting a desired implement lowering rate. When the cartridge is installed, the operator can turn the knurled knob, see Fig. 18, "in" to provide a fast, unrestricted rate of drop. Turning the knurled

knob "out" through its adjustment range progressively slows down the rate of drop. Turning the knob all the way "out" will prevent the implement from being lowered. If a heavy implement is lifted with the knob screwed all the way "out", it may be necessary to use a screwdriver in the slot of the knob to turn the knob "in" sufficiently so the implement will lower.

TRACTOR LIFT LINKS OPERATED WITH AUXILIARY VALVE

With the auxiliary valve installed, the operator may choose to operate the tractor lift links. This can be accomplished with the auxiliary control valve installed, but will not allow simultaneous operation of the remote cylinder. To prepare the valve for this type of operation, turn the switch valve, No. 1, Fig. 14, fully "out" and place the quadrant control lever in auxiliary pumping. Raise the tractor lift links by pulling rearward on the valve spool control lever. Lower the tractor lift links by pushing forward on the valve spool control lever.

OPERATING THE TRACTOR LIFT LINKS IN DRAFT CONTROL

With the auxiliary valve installed, the operator may choose to operate the tractor lift links in draft control to do plowing or operate
