

IMPORTANT

Keep a new tractor on light work for fifty hours.

Do not attempt to turn sharply using one brake when travelling at high speed.

Drive slowly in difficult going.

Do not carry anything on the implement.

Keep all nuts and bolts tight. This precaution is a general practice with all good operators, who have found that it prolongs the life of the tractor by keeping all parts in perfect alignment.

Use an adequate shield to protect the power take-off universal joints.

Do not use the drawbar without the drawbar stays. Keep drawbar adjusted to maintain sufficient weight on front wheels to ensure steering stability.

Allow ten seconds to elapse before re-engaging starter if previous attempt at starting has failed.

When operating tractor in ground speed P.T.O., disengage the P.T.O. drive before attempting to back tractor, otherwise the implement mechanism may be reversed.

Avoid spilling fuel over the engine.

IT IS HIGHLY DANGEROUS TO PULL ANYTHING FROM THE TOP LINK CONNECTION.

YOU HAVE BEEN WARNED
