Masters Of Eden English Edition:

From a "Race of Masters" to a "Master Race": 1948 to 1848 A.E. Samaan, 2020-11-09 Nazism remains an enigma. Historians do not know whether to slot Nazism as a phenomenon of the political right or left largely because of a misunderstanding of how central eugenics was to the regime. Eugenics or racial hygiene was at the core of National Socialism's domestic policy, foreign policy, culture wars, and even Hitler's obsession with cars, highways, and city planning. Thus, no coherent understanding of the regime is possible without first grasping the nature of eugenics. Eugenics did not originate with Nazi Germany. It was the culmination of a worldwide movement that was widely accepted by the global scientific and academic community. This book traces the origins of the Nazi eugenics state, working backward down the timeline, tracing from leaf down to the root. We investigate this 100-year trajectory from its beginnings in British and American Academia, delving into the conveniently forgotten inner workings of a scientific era, uncovering previously unpublished manuscripts, professional correspondence, and conveniently forgotten publications. With the centenary of The Holocaust looming, uprooting the web of professional connections that engendered this movement is in order. The seeds of Holocaust denial take root and prosper with misinformation. Clarity and transparency are imperative as they leave no room for denial theories that would deprive the victims of justice or rob the living of a future. FOR MORE INFORMATION ON THE EUGENICS ANTHOLOGY BOOK SERIES, PLEASE VISIT <https://EugenicsAnthology.com>. FOR MORE INFORMATION ON THIS SPECIFIC VOLUME, PLEASE VISIT <https://RaceOfMasters.com>. NOTE: A preliminary version of this book was circulated amongst academic circles and other interested parties as an Advanced Readers Copy (ARC) in 2015. This version is a part of the Eugenics Anthology, a seven-book series that is currently being completed by A. E. Samaan. Hardbound versions of the books will not be released until the series is complete and all the puzzle pieces are in place.

Inventing Americans in the Age of Discovery Michael Householder, 2016-05-06 *Inventing Americans in the Age of Discovery* traces the linguistic, rhetorical, and literary innovations that emerged out of the first encounters between Europeans and indigenous peoples of the Americas. Through analysis of six texts, Michael Householder demonstrates the role of language in forming the identities or characters that permitted European English speakers primarily to adapt to the unusual circumstances of encounter. Arranged chronologically, the texts examined include John Mandeville's *Travels*, Richard Eden's English language translations of the accounts of Spanish and Portuguese discovery and conquest, George Best's account of Martin Frobisher's voyages to northern Canada, Ralph Lane's account of the abandonment of Roanoke, John Smith's writings about Virginia, and John Underhill's account of the Pequot War. Through his analysis, Householder reveals that English colonists did not share a universal, homogenous view of indigenous Americans as savages, but that the writers, confronted by unfamiliar peoples and situations, resorted to a mixed array of cultural beliefs, myths, and theories to put together workable explanations of their experiences, which then became the basis for how Europeans in the colonies began transforming themselves into Americans.
