Automated driving system ADS technology and ADS enabled operated vehicles commonly referred to as automated vehicles and autonomous vehicles AVs have the potential to impact the world as significantly as the internal combustion engine

Successful ADS technologies could fundamentally transform the automotive industry civil planning the energy sector and more Rapid progress is being made in artificial intelligence AI which sits at the core of and forms the basis of ADS platforms Consequently autonomous capabilities such as those afforded by advanced driver assistance systems ADAS and other automation solutions are increasingly becoming available in the marketplace To achieve highly or fully automated or autonomous capabilities a major leap forward in the validation of these ADS technologies is required Without this critical cog helping to ensure the safety and reliability of these systems and platforms the full capabilities of ADS technology will not be realized This paper explores the ADS validation challenge by reviewing existing approaches and examining the effectiveness of those approaches presenting critical techniques required to bring safe and effective solutions to market discussing unsettled topics and suggesting next steps for industry stakeholders to consider as they work to advance the ADS ecosystem

NOTE SAE EDGE Research Reports are intended to identify and illuminate key issues in emerging but still unsettled technologies of interest to the mobility industry The goal of SAE EDGE Research Reports is to stimulate discussion and work in the hope of promoting and speeding resolution of identified issues SAE EDGE Research Reports are not intended to resolve the issues they identify or close any topic to further scrutiny Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2019001>

**StarBriefs 2001** ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions
