Ford Ka Parts:

Stolen Cars Gabriel Feltran, 2022-01-18 *Stolen Cars* is an innovative ethnography of urban inequalities and violence in São Paulo Brazil. Organized around the journeys of five stolen cars, each chapter discusses a specific theme such as the distinctions between violent robbery and the more commercial non-violent theft or the role of national borders interconnecting illegal and legal economies. Provides an original theoretical framework for a rarely studied urban and transnational supply chain. Draws from empirical data and a combination of different methodologies to demonstrate mechanisms of urban inequalities and violence reproduction. Highlights how everyday life is entangled with structural urban transformations. Uses an ethnographic narrative to show how urban development produces various forms of illegality and violent crime.

The Automotive Industry and European Integration A. J. Jacobs, 2019-08-07. This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.
