Exploration and Exploitation of Minerals for Green Technologies M. Smelror,K. Hanghøj,H. Schiellerup,2023-06-21
Raw materials have been essential in the development of all human societies through history and moving into a greener more
carbon lean future we become increasingly reliant on access to a growing number of raw materials Minerals for new
technologies improving the quality of our lives and the environment are the building blocks of the new Green Stone Age This
Special Publication presents ongoing research and mapping programmes focusing on minerals needed for the transformation
to greener societies In addition to new exploration models and shared geological information on the different prospective
currently mined areas the notion of criticality in different countries is discussed and examples of ongoing national and cross
country research and mapping programmes are presented In addition to the resource reserve and technical economic
aspects the social and environmental dimensions are also a focus in some of the contributions as holistic approaches to the
exploration and exploitation of critical minerals and materials are needed to fulfil the green transition and goals for the
