

# Ford Motor Company Customer-Specific Requirements

## For Use With ISO/TS 16949

*Per ISO/TS 16949, an "organization" is the manufacturing facility being registered to ISO/TS 16949. The sub-tier supplier is the manufacturing facility directly contracted by the organization to ship product to the organization in support of a Ford Motor Company contract.*

*A sub-tier supplier hired by the organization to perform services not directly related to a Ford Motor Company contract (e.g. floor cleaning or grass cutting) is not impacted in any way by the sub-tier supplier development or other sub-tier supplier requirements stated in ISO/TS 16949.*

*In this document, the terms "organization" and "supplier" are interchangeable, both representing the company (or site) being registered to ISO/TS 16949.*

### 1. Scope

ISO/TS 16949 and this document define the fundamental quality system requirements for Ford Motor Company suppliers. This document contains the company-specific requirements supplemental to **Technical Specification, ISO/TS 16949**. These supplemental requirements shall be included in the scope of the registration/certification audit in order to be recognized as satisfying the Ford Motor Company supplier criteria for third-party certification by an IATF recognized and contracted certification body.

ISO/TS 16949 is applicable to manufacturing sites of suppliers to Ford Motor Company (production and service parts and materials), and to assemblers of production parts or materials supplying to Ford Vehicle Assembly Plants.

Tooling & Equipment suppliers to Ford Motor Company are not eligible to be registered to ISO/TS 16949. Registration to ISO 9001 is acceptable. Semi-Conductor suppliers may register to ISO/TS 16949, providing they meet the scope requirements. . .

Service parts and materials applicability does not include aftermarket or remanufactured parts (See Definitions, "Organization").

All **ISO/TS 16949** requirements and the requirements of this document shall be addressed by the organization's quality system.

ISO/TS 16949 sanctioned interpretations are available on <http://www.iatfglobaloversight.org/>.

The US English language version of this document shall be the official version for purposes of third party registration.

*The Practical Application of the Process Capability Study* Douglas B. Relyea, 2011-04-11 Creating a universal language for problem solving The Practical Application of the Process Capability Study Evolving from Product Control to Process Control delineates the process capability study a powerful tool that when understood and implemented provides benefits to every department within a manufacturing organization With easy to read step by step flow diagrams on how to perform process capability studies and measurement process analyses the book's coverage includes The benefits of statistical process control over statistical product control Real world industrial examples and case studies illustrating how to use the techniques Ways for management to determine if the investment in process capability studies is providing an appropriate return Methods to correct lack of stability and capability once either condition has been identified such as the ANOVA technique and the simple three factor designed experiment A flow chart that enables machine operators to execute a process capability study without interfering with productivity A great deal of information is available on the technical concepts of the process capability study much of it emphasizing the mathematics Unfortunately concentrating on the math and fine distinctions such as the difference between alpha and beta type errors has created barriers preventing many from fully appreciating the basic concepts the simplicity and the usefulness of the tool This book shows you how to use the process capability study to increase return on

investment from your statistical process control Six Sigma effort and make your company more competitive      Managing Quality Fads Robert E. Cole, 1999-02-04 Can managers learn from fads That is the question Robert Cole addresses in this insightful book about the various factors supporting and inhibiting organizational learning A longtime student of the Japanese and American quality movements Cole focuses on the response of American industry to the challenge posed in the early 1980s by high quality goods from Japan While most American managers view this challenge as slowly but successfully met many academics see the quality movement that emerged from it as just another fad In seeking to reconcile these two views Cole explores the reasons behind American industry's slow response to Japanese quality arguing that a variety of institutional factors inhibited management action in the early 1980s He then describes the reshaping of institutions that allowed American companies to close the quality gap and to achieve sustained quality improvements in the 1990s Hewlett Packard serves as an example of a company that made this institutional transition more effectively than most Cole describes Hewlett Packard's successful strategies while also pointing out the serious problems that it and other companies face as they attempt to adapt improve and go beyond Japanese practices He also uses Hewlett Packard an exemplar of the highly decentralized company to explore effective strategies for the creation dissemination and implementation of knowledge Unprecedented as a scholarly treatment of the quality movement Managing Quality Fads provides several important lessons for those interested in management decision making under conditions of uncertainty and organizational transformation in a rapidly changing business environment
