web compressibility gases can expand to fill its container unlike solids or liquids the reverse is also true they are easily compressed or squeezed into a smaller volume compressibility is a measure of how much the volume of matter decreases under pressure

chapter 3 section 3 behavior of gases by melissa panzer prezi - Aug 26 2022

web jun 9 2016 chapter 3 section 3 behavior of gases show full text are fluids have no definite shape or volume and they expand to fill their container particles move rapidly in all directions molecules are in constant motion and collide with each other and walls of the container low density because particles are far apart are compressible
