Measuring the Performance of Public Services Michael Pidd, 2012-02-02 Measuring the performance of public agencies and programmes is essential to ensure that citizens enjoy quality services and that governments can be sure that taxpayers receive value for money As such good performance measurement is a crucial component of improvement and planning monitoring and control comparison and benchmarking and also ensures democratic accountability This book shows how the principles uses and practice of performance measurement for public services differ from those in for profit organisations being based on the need to add public value rather than profit It describes methods and approaches for measuring performance through time for constructing and using scorecards composite indicators the use of league tables and rankings and argues that data envelopment analysis is a useful tool when thinking about performance This demonstrates the importance of allowing for the multidimensional nature of performance as well as the need to base measurement on a sound technical footing

Harperism Donald Gutstein, 2014-09-03 Margaret Thatcher transformed British political life forever So did Ronald Reagan in the United States Now Canada has experienced a similar dramatic shift to a new kind of politics which author Donald Gutstein terms Harperism Among its key tenets A weakened labour movement and preferably the disappearance of unions will contribute to Canada's economic prosperity Cutting back government scientific research and data collection will improve public policy making Eliminating First Nations reserves by converting them to private property will improve conditions of life for aboriginal peoples Inequality of incomes and wealth is a good thing and Canada needs more of it These and other essential elements of Harperism flow from neo liberal economic theories propounded by the Austrian economist Friedrich von Hayek and his U S disciples They inspired Thatcherism and Reaganism Stephen Harper has taken this neo liberalism much further in many key areas As Donald Gutstein shows Harper has successfully used a strategy of incremental change coupled with denial of the underlying neo liberal analysis that explains these hard to understand measures The success of Harperism is no accident Donald Gutstein documents the links between the politicians think tanks journalists academics and researchers who nurture and promote

each other's neo liberal ideas They do so using funds provided by ultra rich U S donors by Canadian billionaires like Peter Munk and by many big corporations all of whom stand to gain from the ideas and policies the Harperites develop and push This book casts new light on the last ten years of Canadian politics It documents the challenges that Harperism with or without Stephen Harper will continue to offer to the many Canadians who do not share this pro market world view

Report Card on Ontario's Elementary School 2010 , *Assessment in Education* Shelleyann Scott, Donald E. Scott, Charles F. Webber, 2015-10-20 This book provides key insights into how educational leaders can successfully navigate the turbulence of political debate surrounding leading student assessment and professionalised practice Given the highly politicised nature of assessment it addresses leaders and aspiring leaders who are open to being challenged willing to explore controversy and capable of engaging in informed critical discourse The book presents the macro concepts that these audiences must have to guide optimal assessment policy and practice Collectively the chapters highlight important assessment purposes and models including intended and unintended effects of assessment in a globalised context The book provides opportunities to explore cultural similarities and particularities It invites readers to challenge taken for granted assumptions about ourselves and colleagues in other settings The chapters highlight the cultural clashes that may occur when cross cultural borrowing of assessment strategies policies and tools takes place However authors also encourage sophisticated critical analyses of potential lessons that may be drawn from other contexts and systems Readers will encounter challenges from authors to deconstruct their assessment values beliefs and preconceptions Indeed one purpose of the book is to destabilise certainties about assessment that prevail and to embrace the assessment possibilities that can emerge from cognitive dissonance
