Fire series is a worldwide phenomenon and the world of Westeros has seen multiple adaptations from HBO's acclaimed television series to graphic novels, console games and orchestral soundtracks. This collection of new essays investigates what makes this world so popular and why the novels and television series are being taught in university classrooms as genre-defining works within the American fantasy tradition. This volume represents the first sustained scholarly treatment of George R. R. Martin's groundbreaking work and includes writing by experts involved in the production of the HBO show. The contributors investigate a number of compelling areas including the mystery of the shape-shifting wargs, the conflict between religions, the origins of the Dothraki language and the sex lives of knights. The significance of fan cultures and their adaptations is also discussed.

Medievalism in A Song of Ice and Fire and Game of Thrones Shiloh Carroll, 2018
Game of Thrones is famously inspired by the Middle Ages, but how authentic is the world it presents? This volume offers different angles to the question. One of the biggest attractions of George R. R. Martin's high fantasy series A Song of Ice and Fire and by extension its HBO television adaptation Game of Thrones is its claim to historical realism. The author, the directors and producers of the adaptation and indeed the fans of the books and show all lay claim to Westeros, its setting as representative of an authentic medieval world. But how true are these claims? Is it possible to faithfully represent a time so far removed from our own in time and culture? And what does an authentic medieval fantasy world look like? This book explores Martin's and HBO's approaches to and beliefs about the Middle Ages and how those beliefs fall into traditional medievalist and fantastic literary patterns. Examining both books and programme from a range of critical approaches: medievalism theory, gender theory, queer theory, postcolonial theory and race theory, Dr Carroll analyzes how the drive for historical realism affects the books and show's treatment of men, women, people of colour, sexuality and imperialism, as well as how the author and showrunners discuss these effects outside the texts themselves. SHILOH CARROLL teaches in the writing center at Tennessee State University.

Mapping in Children's Literature Nina Goga, Bettina Kümmerling-Meibauer, 2017-08-15 *Maps and Mapping in Children's Literature* is the first comprehensive study that investigates the representation of maps in children's books as well as the impact of mapping on the depiction of landscapes, seascapes and cityscapes in children's literature. The chapters in this volume pursue a comparative approach as they represent a wide spectrum of diverse genres and national children's literatures by examining a wealth of children's books from Canada, Denmark, Germany, Italy, Norway, Russia, the United Kingdom and the USA. The theoretical and methodological approaches range from literary studies, developmental psychology, maps and geography, literacy, ecocriticism, historical contextualization with both new historicist and political historical leanings and intermediality to materialist cartographies, cultural studies, island studies and genre studies. By this, this volume aims at embedding children's literature in a broader field of literary and cultural studies, thus situating children's literature research within a general context of literary theory.
