The measurement methods used in financial accounting affect our perception of the value and performance of businesses by determining the amount of reported profit or loss and the resources of the business. Thus measurement affects shareholders and other stakeholders in the business. It has even been suggested that the world financial crisis of 2007-2010 was partly due to the mis-measurement of financial instruments. In this book Geoffrey Whittington provides a unique survey of the theory and practice of measurement in financial accounts. It seeks to define and illustrate alternative methods using simple numerical examples and to analyse their theoretical properties. Also it summarises extensive empirical evidence and the historical development of ideas and practice. It is essential reading for advanced undergraduate and postgraduate students studying financial accounting as well as practitioners and policy makers concerned with accounting standards.

It presents policy decisions we have made about our health care system and analyzes some of their consequences to better.

Accounting for Mother Nature Terry Lee Anderson, Laura E. Huggins, Thomas M. Power, 2008. In turn the contributors explore the role that private individuals and organizations can play in protecting natural and agrarian landscapes.
