*Tense Times* Lee M. Pierce, 2023-08-29 How the syntax used in US political discourse creates the very crises it describes American public culture is obsessed with crisis Political polarization economic collapse moral decline the worst seems always yet to come and already here *Tense Times* argues that the ways we discuss these crises especially through verb tenses not only contribute to our perception and description of such crises but create them Past Present Future These are the three principal verb tenses the category of syntax that allows us to discuss time that account for much of what is written about our crisis culture Lee M Pierce invites readers to expand their syntactic inventory beyond tense to include aspect duration and mood attitude Doing so opens new possibilities for understanding crisis discourse as Pierce demonstrates with close readings of three syntaxes the historical present the past imperfective and the retroactive subjunctive Each mode produces a different experience of crisis and can help us understand our current political reality The book investigates a dozen widely circulated discourses from the past decade of US political culture from Beyonc s controversial hit single Formation to the presidential campaign slogans of Hillary Clinton and Donald Trump from the dueling rallies of Glenn Beck and Jon Stewart at the National Mall to the Ground Zero Mosque controversy and the 2007 2008 bailout Taking a comparative approach that integrates theories of syntax from rhetorical literary affect and cultural studies as well as linguistics computer science and Black studies *Tense Times* suggests that the public s conjuring of crisis is not inherently problematic Rather it is the openness of that crisis to contingency the possibility that things could have been otherwise that ought to concern anyone interested in language politics American culture current events or the direction this country is headed

Trust-Based Observations Craig Randall, 2020-07-30 The results are in observations are not improving teaching and learning Pertinently the Gates Foundation's recently completed effort to improve student outcomes through enhancing the teacher evaluation process failed to achieve substantive improvement The way observations are currently designed serve as an obstacle to teacher risk taking Teachers fear negative evaluations when their pedagogy is rated and they lack faith in being supported by supervisors because a trusting relationship between them and their observer has not been built Trust Based Observations Maximizing Teaching and Learning Growth is a schema changing evaluation model that understands people perform at their best when they feel safe and supported It begins with twelve 20 minute observations per week followed by collegial conversations driven by reflective questions sharing observed teaching strengths and the building of safe and trusting relationships with teachers Add the elimination of rating pedagogical skills and replace it with rating mindset and teachers trust When teachers fully embrace risk taking and innovation it leads to remarkable teaching transformations and improved student learning
