Grade 10 Ethiopia Mathematics Text Book:

Education in Ethiopia, 2005 This study provides a detailed snapshot of the education sector up to 2001/02 and for some aspects of the sector up to 2002/03. It takes advantage of administrative data and information from household surveys to document key dimensions of the sector particularly primary and secondary education focusing on costs, finance and service delivery and their impact on learning achievement in an effort to discover potentially important areas for further policy development. foreword

Secondary Education in Ethiopia Rajendra Joshi, Adriaan Verspoor, 2012-11-01 This book discusses reforms that should be undertaken in secondary education to support Ethiopia's transition from a low to middle income economy. The most critical reform identified is the introduction of a flexible curriculum that serves the needs of all students including those who may not pursue higher education.

EFA Global Monitoring Report - 2013-2014 - Teaching and Learning: Achieving quality for all UNESCO, 2014-02-04 The 2013/2014 Education for All Global Monitoring Report shows that a lack of attention to education quality and a failure to reach the marginalized have contributed to a learning crisis that needs urgent attention. Worldwide 250 million children, many of them from disadvantaged backgrounds, are not learning the basics. Teaching and Learning: Achieving Quality for All describes how policy makers can support and sustain a quality education system for all children regardless of background by providing the best teachers. The Report also documents global progress in achieving Education for All goals and provides lessons for setting a new education agenda post 2015. In addition, the Report identifies that insufficient financing is hindering advances in education.

Education Sector Plans and their Implementation in Developing Countries Roy Carr-Hill, 2023-03-09 This book examines the factors affecting the successful implementation of Education Sector Plans in developing countries. It provides a detailed comparison that draws on data from 27 countries to offer careful research conclusions and policy recommendations. Offering a detailed comparison of the schooling situation, e.g. availability of potable water and toilets, provision for the disabled as well as educational outcomes, both test scores and percentages out of school, from the 27 countries, using empirical evidence, the book examines the resources that have been invested in different education sectors, investigating the development and success of each plan. The volume uses correlation analysis to compare factors including the availability of government funding, national characteristics, ministerial decisions, influences of country and donor stakeholders as well as district and school level issues. Thorough comparative analysis of the data is then demonstrated with two measures of achievements to identify which factors can be considered as the most important in order to reach realistic policy and research conclusions. Timely and engaging, this book will be of great interest to researchers, scholars and postgraduate students in the field of education and international development, comparative education and international education more broadly.
