Number in the World's Languages Paolo Acquaviva, Michael Daniel, 2022-06-21 The strong development in research on grammatical number in recent years has created a need for a unified perspective The different frameworks the ramifications of the theoretical questions and the diversity of phenomena across typological systems make this a significant challenge This book addresses the challenge with a series of in depth analyses of number across a typologically diverse sample unified by a common set of descriptive and analytic questions from a semantic morphological syntactic and discourse perspective Each case study is devoted to a single language or in a few cases to a language group They are written by specialists who can rely on first hand data or on material of difficult access and can place the phenomena in the context of the respective system The studies are preceded and concluded by critical overviews which frame the discussion and identify the main results and open questions With specialist chapters breaking new ground this book will help number specialists relate their results to other theoretical and empirical domains and it will provide a reliable guide to all linguists and other researchers interested in number *Grammaticalization Scenarios from Africa, the Americas, and the Pacific* Walter Bisang, Andrej Malchukov, 2020-09-21 This volume intends to fill the gap in the grammaticalization studies setting as its goal the systematic description of grammaticalization processes in genealogically and structurally diverse languages To address the problem of the limitations of the secondary sources for grammaticalization studies the editors rely on sketches of grammaticalization phenomena from experts in individual languages guided by a typological questionnaire **South Africa Yearbook** , 2009 **The National Bibliography of Botswana** , 1987
