Engaging Ideas John C. Bean,2011-07-20 Learn to design interest provoking writing and critical thinking activities and incorporate them into your courses in a way that encourages inquiry exploration discussion and debate with Engaging Ideas a practical nuts and bolts guide for teachers from any discipline Integrating critical thinking with writing across the curriculum approaches the book shows how teachers from any discipline can incorporate these activities into their courses This edition features new material dealing with genre and discourse community theory quantitative scientific literacy blended and online learning and other current issues **On the Possibility of a Digital University** Lavinia Marin,2021-01-12 This book proposes a philosophical exploration of the educational role that media plays in university study practices with a focus on the practices of lecturing and academic writing Are the media employed in university study practices mere accessories or rather constitutive of these practices While this seems to be a purely theoretical question its practical implications are wide and concern whether such a thing as a digital university is possible The digital university has been for a long time a theoretical construct However in the aftermath of the Covid 19 pandemic moving the university into the digital realm has become a necessity The difficulties in transitioning to an online university during the 2020 pandemic showed the increased urgency of the questions explored in this book The book describes lecturing and academic writing through the lens of a phenomenology of gestures and arrives at a description of the experience of university thinking as expanding the subject s range of experiences about the world and about one s modes of thinking about the world The media configuration characteristic for university study practices is a movement of rendering inoperative one medium through another medium so that thinking can emerge a movement called mediatic displacement The question of the digital university becomes then a question whether mediatic displacement is possible on a digital screen Although this is conceivable digital technologies are still relatively new and we are not used to playing with them in a profanatory way as the book discusses through the example of videoconferencing and MOOCs The promise of the digital university seems to remain utopian until we figure out how to enact the techniques of mediatic displacement currently flourishing at the physical university Both emerging and established researchers will benefit from this book since it offers an alternative way of discussing the possibility of a digital

transformation of the university starting from a phenomenology of gestures and an understanding of thinking as a collective experience of potentiality and profanation at the same time By combining two perspectives media theoretical and educational philosophical this book show a new way of understanding what makes a university and thus contributes to the emerging debate on the digital university The Dialectical Forge Walter Edward Young,2016-12-13 The Dialectical Forge identifies dialectical disputation jadal as a primary formative dynamic in the evolution of pre modern Islamic legal systems promoting dialectic from relative obscurity to a more appropriate position at the forefront of Islamic legal studies The author introduces and develops a dialectics based analytical method for the study of pre modern Islamic legal argumentation examines parallels and divergences between Aristotelian dialectic and early juridical jadal theory and proposes a multi component paradigm the Dialectical Forge Model to account for the power of jadal in shaping Islamic law and legal theory In addition to overviews of current evolutionary narratives for Islamic legal theory and dialectic and expositions on key texts this work shines an analytical light upon the considerably sophisticated proto system of juridical dialectical teaching and practice evident in Islam s second century several generations before the first full system treatises of legal and dialectical theory were composed This proto system is revealed from analyses of dialectical sequences in the 2nd 8th century Kit b Ikhtil f al Ir qiyy n Ir qiyyayn the subject text through a lens molded from 5th 11th century jadal theory treatises the lens texts Specific features thus uncovered inform the elaboration of a Dialectical Forge Model whose more general components and functions are explored in closing chapters
