

## RS-232 commands

### Communication Configuration

Visit our website for additional RS-232 settings and information:

To control this projector via RS-232, connect a null modem cable and set the control system serial port settings to match the following communication configurations:

RS-232 Port Settings	
Setting	Value
Bps per second	19,200
Data bits	8
Parity	None
Stop bits	1
Flow control	None
Emulation	VT100

### Command Format

All commands consist of 3 alpha characters followed by a space, all enclosed in parentheses. The space can be a null request (indicated by a " ") or a write request (indicated by 1 to 4 ASCII digits).

A read request example:

```
(AAA) where  
( starts the command  
AAA denotes the command  
 ) denotes the read request  
) ends the command
```

A read command returns the range and the current setting, for example:

Read Command Examples		
Function	Command	Response
Brightness	(BRT)	(M-148,128)
Volume	(VOL)	(0-80, 8)
Lamp Hours	(LPH)	(0-4000H, 40)

A write request example:

```
(AAAdigit) where  
( starts the command  
AAA denotes the command  
digit denotes the value to be written  
(ending zeros are necessary)  
) ends the command
```

Some commands have ranges, while others are absolute. If a number greater than the maximum range is received, it is automatically set to the maximum number for that function. If a command is received that is not understood, a "T" is returned. With absolute settings, "T" is ok. 1-4000 is ok. The one exception is the Power command, where 0 is off and 1 is on.

To assure the projector can process a command, wait 3 seconds before entering the next command.
