Project Overview

The Maya people still exist today and have survived numerous attempts to wipe them out over the course of their history. This unit refers mainly to the classical Maya period, which stretches from approx. 250-950 AD. During this time society became more organised around urban areas and society became more organised. Advances were made in astronomy, maths and language, as well as architecture and agriculture. Links were made with other peoples across the continent. Scholars disagree over why the classical period came to an end, although it has been hypothesised that it was caused by a widespread drought, which ended the growth of society and impoverished the population.

Life in a Maya Settlement

Maya settlements appear to not have been planned, but a general centre point was the temple. It is thought that the stepped temples were built both as a statement of grandeur and as a route to the heavens above. This is something the Maya have in common with many other civilisations across the ancient world. Rumours of human sacrifice have seeped into popular culture, but appear to be overblown. Each settlement also had wide-open plazas which served as a meeting point, as well as a ball court where games were held. Cities were generally not organised in an idealist way, but had lots of common features. There does not appear to have been a central point of authority in the Maya empire, rather society was organised through a number of rulers at local level. This is perhaps the reason the Mayans endured, without a central powerbase that could be decapitated, agreements had to be made with a number of rulers. In a way this is similar to the Indians, or even European, city-states.

Information Report On Ancient Mayan:

The Ancient Maya Heather McKillop, 2004-08-19 Thanks to powerful innovations in archaeology and other types of historical research we now have a picture of everyday life in the Mayan empire that turns the long accepted conventional wisdom on its head Ranging from the end of the Ice Age to the flourishing of Mayan culture in the first millennium to the Spanish conquest in the 16th century *The Ancient Maya* takes a fresh look at a culture that has long held the public's imagination Originally thought to be peaceful and spiritual the Mayans are now also known to have been worldly bureaucratic and violent Debates and unanswered questions linger Mayan expert Heather McKillop shows our current understanding of the Maya explaining how interpretations of dirt archaeology hieroglyphic inscriptions and pictorial pottery are used to reconstruct the lives of royalty artisans priests and common folk She also describes the innovative focus on the interplay of the people with their environments that has helped further unravel the mystery of the Mayans rise and fall

Ancient Maya Arthur Demarest, 2004-12-09 In this new archaeological study Arthur Demarest brings the lost pre Columbian civilization of the Maya to life In applying a holistic perspective to the most recent evidence from archaeology paleoecology and epigraphy this theoretical interpretation emphasises both the brilliant rain forest adaptations of the ancient Maya and the Native American spirituality that permeated all aspects of their daily life Demarest draws on his own discoveries and the findings of colleagues to reconstruct the complex lifeways and volatile political history of the Classic Maya states of the first to eighth centuries He provides a new explanation of the long standing mystery of the ninth century abandonment of most of the great rain forest cities Finally he draws lessons from the history of the Classic Maya cities for contemporary society and for the ongoing struggles and resurgence of the modern Maya peoples who are now re emerging from six centuries of oppression

Research Reports on Ancient Maya Writing, 1985 **Understanding Maya Inscriptions** John F. Harris, Stephen K. Stearns, 1997-01-29 This second edition includes revised and updated versions of three earlier publications *Understanding Maya Inscriptions* *A Hieroglyph Handbook* *New and Recent Maya Hieroglyph Readings* and *A Resource Bibliography for the Decipherment of Maya Hieroglyphs* and *New Maya Hieroglyph Readings* This volume is designed to function as a self teaching tool to help the neophyte and yet be of value to scholars It introduces the latest methods of analysis illustrates techniques for computing Maya calendrics uses the currently accepted orthography provides syllabary and syntax suggests new glyph readings and presents various interpretations

The New Archaeology and the Ancient Maya Jeremy A. Sabloff, 1994-08-15 Nowadays archaeological investigators don't just dig up the past They use high tech equipment chemical analyses sampling strategies and other modern means to gain a better understanding of why and how cultures change Using the study of the Maya as a test case Jeremy Sabloff shows how the exciting transformation of archaeology is shedding new light on past civilizations

Perspectives on Ancient Maya Rural Complexity Samuel V. Connell, Gyles Iannone, 2003-12-01 Settlement archaeology in the Maya area has focused much of its attention on

the polar extremes of the settlement continuum As a result of this urban rural bias a whole range of complex rural settlements remain under explored The chapters in this volume highlight the variable quality of these middle level settlements

The Ancient Maya Marketplace Eleanor M. King, 2015-11-12 Trading was the favorite occupation of the Maya according to early Spanish observers such as Fray Diego de Landa 1566 Yet scholars of the Maya have long dismissed trade specifically market exchange as unimportant They argue that the Maya subsisted primarily on agriculture with long distance trade playing a minor role in a largely non commercialized economy The Ancient Maya Marketplace reviews the debate on Maya markets and offers compelling new evidence for the existence and identification of ancient marketplaces in the Maya Lowlands Its authors rethink the prevailing views about Maya economic organization and offer new perspectives They attribute the dearth of Maya market research to two factors persistent assumptions that Maya society and its rainforest environment lacked complexity and an absence of physical evidence for marketplaces a problem that plagues market research around the world Many Mayanists now agree that no site was self sufficient and that from the earliest times robust local and regional exchange existed alongside long distance trade Contributors to this volume suggest that marketplaces the physical spaces signifying the presence of a market economy did not exist for purely economic reasons but served to exchange information and create social ties as well The Ancient Maya Marketplace offers concrete links between Maya archaeology ethnohistory and contemporary cultures Its in depth review of current research will help future investigators to recognize and document marketplaces as a long standing Maya cultural practice The volume also provides detailed comparative data for premodern societies elsewhere in the world

Handbook to Life in the Ancient Maya World Lynn V. Foster, 2005 This comprehensive and accessible reference explores the greatest and most mysterious of civilizations hailed for its contributions to science mathematics and technology Each chapter is supplemented by an extensive bibliography as well as photos original line drawings and maps

[Ancient Maya Cities of the Eastern Lowlands](#) Brett A. Houk, 2016-10-05 Brings together for the first time all the major sites of this part of the Maya world and helps us understand how the ancient Maya planned and built their beautiful cities It will become both a handbook and a source of ideas for other archaeologists for years to come George J. Bey III coeditor of *Pottery Economics in Mesoamerica* Skillfully integrates the social histories of urban development Vernon L. Scarborough author of *The Flow of Power Ancient Water Systems and Landscapes* Any scholar interested in urban planning and the built environment will find this book engaging and useful Lisa J. Lucero author of *Water and Ritual* For more than a century researchers have studied Maya ruins and sites like Tikal Palenque Copán and Chichén Itz' have shaped our understanding of the Maya Yet cities of the eastern lowlands of Belize an area that was home to a rich urban tradition that persisted and evolved for almost 2 000 years are treated as peripheral to these great Classic period sites The hot and humid climate and dense forests are inhospitable and make preservation of the ruins difficult but this oft ignored area reveals much about Maya urbanism and culture Using data collected from different sites throughout the lowlands

including the Vaca Plateau and the Belize River Valley Brett Houk presents the first synthesis of these unique ruins and discusses methods for mapping and excavating them Considering the sites through the analytical lenses of the built environment and ancient urban planning Houk vividly reconstructs their political history considers how they fit into the larger political landscape of the Classic Maya and examines what they tell us about Maya city building *The Ancient Maya, 6th Edition* Robert J. Sharer, Loa P. Traxler, 2006 The rich findings of recent exploration and research are incorporated in this completely revised and greatly expanded sixth edition of this standard work on the Maya people New field discoveries new technical advances new successes in the decipherment of Maya writing and new theoretical perspectives on the Maya past have made this new edition necessary The Real Business of Ancient Maya Economies Marilyn A. Masson, David A. Freidel, Arthur A. Demarest, 2020-08-25 A timely synthesis of the latest research and perspectives on ancient Maya economics this volume illuminates the sophistication and intricacy of economic systems in the Preclassic Classic and Postclassic periods Contributors from a wide range of disciplines move beyond paradigms of elite control and centralized exchange to focus on individual agency highlighting production and exchange that took place at all levels of society Case studies draw on new archaeological evidence from rural households and urban marketplaces to reconstruct the trade networks for tools ceramics obsidian salt and agricultural goods throughout the empire They also describe the ways household production integrated with community regional and interregional markets Redirecting the field of ancient Maya economic studies away from simplistic characterizations of the past by fully representing the range of current views on the subject this volume delves deeply into multiple facets of a complex interdependent material world Contributors Anthony P. Woodfill Andrew R. Wyatt Norman Yoffee A volume in the series Maya Studies edited by Diane Z. Chase and Arlen F. Chase **Maya Christian Murals of Early Modern Yucatán** Amara Solari, Linda K. Williams, 2024 This multidisciplinary project studies religious murals that were painted by Christianized Maya artists in the first centuries after the conquest of Mexico Solari and Williams study the paintings all of which are based in the Yucatán Peninsula from an art history perspective along with the printed sources referencing the murals At the same time they examine the chemical signatures left by the murals pigments and the techniques used in their

production through state of the art imaging technologies By using these methodologies the authors seek to explain the many ways in which cultural and material exchange took place between the Spanish and Maya peoples At first glance murals depicting Spanish ideals of Western Christianity would appear to be an obvious and frequent tool of oppression in the Yucatán as they were elsewhere in the Americas but they were also a form of agency for Indigenous people as a means to shape these narratives with their own subtle imagery and ideas drawn from Mayan cosmologies and cultural traditions These painters used European pictorial techniques such as perspective while also using local materials to create vivid pigments and colors never before seen in murals in Europe The authors seek to trace how the initial and continued use of these material sources to create these images led to a much more localized form of Catholicism that continues to be practiced by Mayan speakers today

Maya Intellectual Renaissance Victor D. Montejo, 2010-01-01 When Mayan leaders protested the celebration of the Quincentenary of the discovery of America and joined with other indigenous groups in the Americas to proclaim an alternate celebration of 500 years of resistance they rose to national prominence in Guatemala This was possible in part because of the cultural political economic and religious revitalization that occurred in Mayan communities in the later half of the twentieth century Another result of the revitalization was Mayan students enrollment in graduate programs in order to reclaim the intellectual history of the brilliant Mayan past Victor Montejo was one of those students This is the first book to be published outside of Guatemala where a Mayan writer other than Rigoberta Menchu discusses the history and problems of the country It collects essays Montejo has written over the past ten years that address three critical issues facing Mayan peoples today identity representation and Mayan leadership Montejo is deeply invested in furthering the discussion of the effectiveness of Mayan leadership because he believes that self evaluation is necessary for the movement to advance He also criticizes the racist treatment that Mayans experience and advocates for the construction of a more pluralistic Guatemala that recognizes cultural diversity and abandons assimilation This volume maps a new political alternative for the future of the movement that promotes inter ethnic collaboration alongside a reverence for Mayan culture
