**Thought**

**and Knowledge** Diane F. Halpern, Dana S. Dunn, 2022-10-25 Thought and Knowledge applies theory and research from the learning sciences to teach students the critical thinking skills that they need to succeed in today's world. The text identifies, defines, discusses, and deconstructs contemporary challenges to critical thinking from fake news, alternative facts, and deep fakes to misinformation, disinformation, post truth, and more. It guides students through the explosion of content on the internet and social media and enables them to become careful and critical evaluators as well as consumers. The text is grounded in psychological science, especially the cognitive sciences, and brought to life through humorous and engaging language and numerous practical and real world examples and anecdotes. This edition has been streamlined with thoughtful consideration over what content to keep, what to cut, and how much new and current research to add. Critical thinking skills are presented in every chapter, empowering students to learn more efficiently, research more productively, and present logical, critical, and informed arguments. The skills are reviewed at the end of the chapter, and a complete list of skills with definitions and examples are included in the appendix. The text is supported by a companion website that features a robust set of instructor and student resources: [www.routledge.com/cw/halpern](http://www.routledge.com/cw/halpern). Thought and Knowledge can be used as a core text in critical thinking courses offered in departments of psychology, philosophy, English, or across the humanities and social sciences, or as a supplement in any course where critical thinking is emphasized.

**Genre Explained** Christine Tardy, Nigel A. Caplan, Ann Johns, 2023-03-20 Genre Explained presents accessible research-grounded answers to 40 questions that teachers frequently have about genre-based writing instruction. , Contemporary Perspectives on Rhetoric Sonja K. Foss, Karen A. Foss, Robert Trapp, 2014-04-04 The anniversary edition marks thirty years of offering an indispensable review and analysis of thinkers who have exerted a profound influence on contemporary rhetorical theory. I. A. Richards, Ernesto Grassi, Chaim Perelman, and Lucie Olbrechts-Tyteca, Stephen Toulmin, Richard Weaver, Kenneth Burke, Jürgen Habermas, bell hooks, Jean Baudrillard, and Michel Foucault. The brief biographical sketches locate the theorists in time and place, showing how life experiences influenced perspectives on rhetorical thought. The concise explanations of complex concepts are clear, engaging, insightful, and highly accessible, serving as an excellent primer for reading the major works of these scholars. The critical commentary is carefully chosen to highlight implications and to place the theories within a broader rhetorical context. Each chapter ends with a complete bibliography of works by the theorists.

**Personal Autonomy in Plural Societies** Marie-Claire Foblets, Michele Graziadei, Alison Dundes Renteln, 2017-11-22 This volume addresses the exercise of personal autonomy in contemporary situations of normative pluralism. In the Western liberal tradition, from a strictly legal and theoretical perspective, the social individual has the right to exercise the autonomy of his or her will. In a context of legal plurality, however, personal autonomy becomes more complicated. Can and should personal autonomy be recognized as a legal foundation for protecting a person's freedom to renounce what others view as his or her fundamental human rights? This collection develops an interdisciplinary conceptual framework to address these questions and presents empirical studies.

examining the gap between the principle of personal autonomy and its implementation In a context of cultural diversity this gap manifests itself in two particular ways First not every culture gives the same pre eminence to personal autonomy when examining the legal effects of an individual s acts Second in a society characterized by weak pluralism the legal assessment of personal autonomy often favours the views of the dominant majority In highlighting these diverse perspectives and problematizing the so called guardian function of human rights i e purporting to protect weaker parties by limiting their personal autonomy in the name of gender equality fair trial etc this book offers a nuanced approach to the principle of autonomy and addresses the questions of whether it can effectively be deployed in situations of internormativity and what conditions must be met in order to ensure that it is not rendered devoid of all meaning
