Manual Social Background:

Education, Social Background and Cognitive Ability Gary N. Marks, 2013-10-23 Are socioeconomic inequalities in education declining Is socioeconomic background becoming less important for people's occupational class or status How important is cognitive ability for education and later occupational outcomes How do countries differ in the importance of socioeconomic background for education and work Gary N Marks argues that in western industrialized countries pervasive views that socioeconomic background or class background has strong and unchanging relationships with education and later socioeconomic outcomes resistant to policy and social change are unfounded Marks provides a large amount of evidence from many countries showing that the influence of socioeconomic background for education is moderate and most often declining and socioeconomic background has only very weak impacts on adults occupation and earnings after taking into account education and cognitive ability Furthermore Marks shows that cognitive ability is a more powerful influence than socioeconomic background for educational outcomes and that in addition to its indirect effects through education has a direct effect on occupation and earnings Its effects cannot be dismissed as simply another aspect of socioeconomic background nor do the usual criticisms of cognitive ability apply The declining effects for socioeconomic background and the importance of cognitive ability support several of the contentions of modernization theory The book contributes to a variety of debates within sociology quantitative and qualitative approaches explanatory and non explanatory theory the relationship between theory and empirical research the role of political ideology in research sociology as a social science and sociology's contribution to knowledge about contemporary societies It will appeal to professionals in the fields of education and sociology as well as postgraduate students and academics involved in the debate [Social Class in Contemporary Japan](#) Hiroshi Ishida, David H. Slater, 2009-10-16 Through examination of contemporary Japanese society this book demonstrates that the analysis of class formation is fundamental for a clear understanding of institutions and collective identity such as family school work gender and ethnicity [Education Reform and Social Class in Japan](#) 山口洋子, 2013 Until the early 1990s Japanese education was widely commended for achieving outstanding outcomes in global comparison At the same time it was frequently criticized for failing to cultivate individuality and creativity in students Wide ranging education reforms were enacted during the 1990s to remedy these perceived failings However as this book argues the reforms produced a different outcome than intended contributing to growing disparity in learning motivation and educational aspiration of students from different class backgrounds instead Takehiko Kariya demonstrates by way of empirical sociological analysis that educational inequality in Japan has been expanding and that a new mechanism of educational selection has begun to operate which he calls the incentive divide Casting light on recent changes in Japanese society to critically reassess educational policy choices this book's quantitative and qualitative analyses of the mass education society in post war Japan offer important insights also for understanding similar problems faced in other parts of the world at present Translated into English for the first time the

Transitions to Adulthood in Europe M. Corijn,Erik Klijzing,2013-06-29 The diversification in family practices constitutes a major theme of research in the field of population studies A substantial part of these diversification processes are linked to the stage of family formation The increase in non marital cohabitation and non marital fertility and the postponement of marriage and parenthood have particularly characterised the transition from youth to adulthood among the post war cohorts In studying the transition from youth to adulthood the timing of events is crucial Different timing patterns are the product of the interplay between a multitude of factors in the institutional as well as the personal context In this respect cross country comparative research is a powerful tool to understand the determinants of the change processes To move beyond the mere description of the changes is a challenge that not only is eminently scientific it also gives the necessary insights to grasp the implications of the changes for policy From this policy perspective the postponement of the integration into adulthood has major societal consequences such as the very low fertility and the fact that the family formation itself became a matter of choice Over the years the Population and Family Studies Centre CBGS a scientific institute of the Flemish Community has intensively investigated these changes constituting the Second Demographic Transition not only through national but through cross national comparative research
