Master Of Chemical Engineering Curtin:

Applications in Industry ,1998-12-17 Volume I contains a brief review of adsorption history and its development for practical purposes up until now It also presents some important information on adsorbents and catalysts as well as on the methods of their characterization The part of this volume dealing with practical industrial applications includes chapters presenting advanced technical tools for high capacity adsorption separation of liquid and gas mixtures development of new adsorbents for removal of hazardous contaminants from combustion flue gases and wastewaters degasification of coal seams and fabrication of inorganic membranes and their applications A comprehensive review is also included on contemporary utility of self assembled monolayers adsorption proteins and their role in modern industry adsorption methods in technology of optical fibre glasses sol gel technology solid desiccant dehumidification systems etc The articles give both the scientific backgrounds of the phenomena discussed and emphasize their practical aspects The chapters give not only brief current knowledge about the studied problems but are also a source of topical literature on the subject A comprehensive bibliography on adsorption principles design data and adsorbent materials for industrial applications for the period 1967 1997 concludes the book Protein Byproducts Gurpreet Singh Dhillon,2016-08-13 Protein Byproducts Transformation from Environmental Burden into Value Added Products deals with the added value of proteinaceous waste byproducts discussing in detail the different sources of protein rich byproducts their extraction recovery and characterization The book provides thorough insights into different protein modification techniques to extend the product portfolio using these waste byproducts Divided between three main sections the book covers various feedstock resources such as animal derived plant derived proteins marine waste derived proteins protein extraction and recovery methods and related technical issues including modification and conversion technologies for the production of high value bioproducts It contains contributions from experts in the fields of applied industrial microbiology engineering bioprocess technology protein chemistry food chemistry agriculture plant sciences environmental science and waste management serving as a comprehensive reference for students and research scientists in the food and agriculture industries Covers various feedstock resources protein extraction recovery methods and related technical issues Presents modification and conversion technologies for the production of high value bioproducts Exhibits case studies and examples to illustrate both driving forces and constraints in the utilization of these proteinaceous materials Contains contributions from experts in the fields of applied industrial microbiology engineering bioprocess technology protein chemistry food chemistry agriculture plant sciences environmental science and waste management Serves as a comprehensive reference for students and research scientists in the food and agriculture industries

Air, Gas, and Water Pollution Control Using Industrial and Agricultural Solid Wastes Adsorbents Tushar Kanti Sen,2017-10-20 Air and water pollution occurs when toxic pollutants of varying kinds organic inorganic radioactive and so on are directly or indirectly discharged into the environment without adequate treatment to remove these potential pollutants

There are a total of 13 book chapters in three sections contributed by significant number of expert authors around the world aiming to provide scientific knowledge and up to date development of various solid wastes based cost effective adsorbent materials and its sustainable application in the removal of contaminates pollutants from air gas and water This book is useful for the professions practicing engineers scientists researchers academics and undergraduate and post graduate students interest on this specific area Key Features Exclusive compilation of information on use of industrial and agricultural waste based adsorbents for air and water pollution abatement Explores utilization of industrial solid wastes in adsorptive purification and agricultural and agricultural by products in separation and purification Discusses cost effective solid wastes based emerging adsorbents Alternative adsorbents in the removal of a wide range of contaminants and pollutants from water is proposed Includes performance of unit operations in waste effluents treatment Chemical Engineering Education ,1991

Chemical Engineering Faculty Directory J. Steven Swinnea,AIChE,2010 This up to date faculty directory lists the contact information of all the faculty members placement administrators and student organizations of almost 500 worldwide universities and technical institutes offering chemical engineering curricula This offers a comprehensive reference tool that is unique and valuable in that there is no such directory available on chemical engineering The indices make it easy to find the current affiliation of any chemical biological and environmental engineering faculty by listing in alphabetical order

Chemical Engineering Faculty Directory 2002-2003 D.R. Lloyd,2002-12-31 Updated annually this directory provides information on over 150 US and over 250 international chemical engineering programmes

Developments in Engineering Education Standards: Advanced Curriculum Innovations Rasul, Mohammad,2012-04-30 SUMMARY

Managing Mining and Minerals Processing Wastes Chongchong Qi,Craig H Benson,2023-03-10 Managing Mining and Minerals Processing Wastes Concepts Design and Applications presents fundamental knowledge in waste management in mining and minerals processing and summarizes recent advances The book offers readers insights into innovative ways to manage waste in the mining and minerals industry Sections cover a brief introduction to this topic and an explanation of waste generation and how to manage the six types of waste including waste rock mill tailings coal refuse and coal fly ash quarry waste metallurgical slugs and washery rejects The title then emphasizes the management of hazardous waste the acid mine drainage and the lifecycle assessment of waste management Finally the book considers current and emerging challenges This publication offers a comprehensive background to waste management in mining and minerals processing and a summary of recent advances and innovative strategies for managing each kind of waste Presents the background to waste management in minerals and mining also summarizing recent advances Provides an accessible introduction to the current state of and future prospects for waste management Helps readers increase their usable knowledge on waste management in mining and minerals engineering Offers new insights into how waste can be managed in innovative ways Covers hazardous waste acid mine drainage lifecycle assessment and emerging issues *Handbook of Microalgae-Based Processes and*

Products Eduardo Jacob-Lopes, Mariana Manzoni Maroneze, Maria Isabel Queiroz, Leila Queiroz Zepka, 2020-07-23 The Handbook of Microalgae based Processes and Products provides a complete overview of all aspects involved in the production and utilization of microalgae resources at commercial scale Divided into four parts fundamentals microalgae based processes microalgae based products and engineering approaches applied to microalgal processes and products the book explores the microbiology and metabolic aspects of microalgae microalgal production systems wastewater treatment based in microalgae CO₂ capture using microalgae microalgae harvesting techniques and extraction and purification of biomolecules from microalgae It covers the largest number of microalgal products of commercial relevance including biogas biodiesel bioethanol biohydrogen single cell protein single cell oil biofertilizers pigments polyunsaturated fatty acids bioactive proteins peptides and amino acids bioactive polysaccharides sterols bioplastics UV screening compounds and volatile organic compounds Moreover it presents and discusses the available engineering tools applied to microalgae biotechnology such as process integration process intensification and techno economic analysis applied to microalgal processes and products microalgal biorefineries life cycle assessment and exergy analysis of microalgae based processes and products The coverage of a broad range of potential microalgae processes and products in a single volume makes this handbook an indispensable reference for engineering researchers in academia and industry in the fields of bioenergy sustainable development and high value compounds from biomass as well as graduate students exploring those areas Engineering professionals in bio based industries will also find valuable information here when planning or implementing the use of microalgal technologies Covers theoretical background information and results of recent research Discusses all commercially relevant microalgae based processes and products Explores the main emerging engineering tools applied to microalgae processes including techno economic analysis process integration process intensification life cycle assessment and exergy analyses

Enhanced Oil Recovery Ajay Mandal, Keka Ojha, 2023-11-29 Oil recovery efficiency can be increased by applying the enhanced oil recovery EOR processes which are based on the improvement of mobility ratio reduction of interfacial tension between oil and water wettability alteration reduction of oil viscosity formation of oil banks and so forth This book describes the different EOR methods and their mechanisms which are traditionally used after conventional primary and secondary processes The present scenario of different EOR processes at both the field application stage and research stage is also covered Further it discusses some of the recent advances in EOR processes such as low salinity water flooding the application of nanotechnology in EOR microbial EOR carbonated water injection etc Features Comprehensive coverage of all enhanced oil recovery EOR methods Discussion of reservoir rock and fluid characteristics Illustration of steps in design and field implementation as well as the screening criteria for process selection Coverage of novel topics of nanotechnology in EOR and hybrid EOR method and low salinity waterfloods Emphasis on recent technologies feasibility and implementation of hybrid technologies This book is aimed at graduate students professionals researchers
