the effectiveness of the professional development that supports improved outcomes for learners This book demonstrates that masterliness in education an aspiration of initial and continuing teacher education internationally is a state of advanced professional critical thinking linked to action and informed by research and evidence Through the exercise of this criticality teacher empowerment expertise and autonomy increase as masterliness develops There is considerable convergence in the provision of these elements of Masters level courses internationally and this enables the debate to highlight good practice and to exemplify those essential characteristics of masterliness in teaching that lead to the continued improvement of learning in the world s schools This book was originally published as a special issue of Journal of Education for Teaching
