DESCRIPTION

Speakers used with amplified instruments are subjected to the severest possible operational and handling conditions. Even so, failure of a speaker in live performance is intolerable. The SRO/12 musical instrument speaker combines reliability with high efficiency. A massive die-cast speaker basket and welded magnetic structure assure precise alignment of moving parts regardless of the amount of handling encountered during normal usage. The powerful magnet structure combines with an extremely efficient edgewise-wound copper voice coil to produce greater sound pressure level for the same amplifier input. Efficiency of the SRO/12 is up to 3 db greater than original equipment music speakers—and that is the equivalent of doubling your amplifier output.

Efforts to improve the reliability of musical instrument speakers center on two main causes of failure: destruction of the voice-coil assembly from excessive power dissipation, and mechanical failure caused by over-driving the mechanical suspension. Careful attention to detail in design and construction of the SRO/12 speaker allow unsurpassed power ratings. The continuous sine wave rating of 60 watts applies to continuous output instruments, such as electronic organs. The initial pulse of a plucked guitar string, on the other hand, produces many times the power of a continuous tone. In such cases, the mechanical power limit is of greater importance than the average power. A single SRO/12 will handle with ease guitar amplifiers of up to 300 watts peak output, at normally rated.

INSTALLATION

The SRO/12 is an excellent choice for replacing the present speakers in your system, upgrading sound quality as well as reliability. Cabinet requirements are not critical; you need not worry about modifications to your existing

cabinet. However, if a system is being built from scratch, a properly designed enclosure will insure that your system benefits from the full performance of the SRO/12. Specific enclosure recommendations are available directly from Electro-Voice.

Secure the speaker to the baffle board just tightly enough to compress the speaker gasket. Excessive tightening is not necessary as the compressible gasket will form an acoustical seal with nominal pressure. A second nut should be run on the mounting bolt and tightened down against the first nut to prevent its loosening during operation.

CONNECTIONS

Use No. 18 or larger fixture wire to connect the two terminals on the loudspeaker to the amplifier output. If a choice of amplifier output impedance is available (4, 8, 16 ohms), a single SRO/12 speaker should be connected to the 8 ohm tap. If two SRO/12 speakers are used, they should be connected in parallel. Be sure to
