Materials and Devices is a second edition following the initial Optoelectronics Materials and Techniques book published in 2011 as part of the InTech collection of international works on optoelectronics. Optoelectronics as the discipline devoted to the study and application of electronic devices that emit, detect and otherwise control light has widely proliferated globally and enabled many of today's modern conveniences. Because of this ubiquity, new applications and novel optical phenomena continue to drive innovation. Accordingly, as with the first book of the collection, this book covers recent achievements by specialists around the world. The growing number of countries participating in this endeavor includes now Brazil, Canada, China, Egypt, France, Germany, India, Italy, Japan, Malaysia, Mexico, Moldova, Morocco, Netherlands, Portugal, Romania, Saudi Arabia, South Korea, Taiwan, Ukraine, USA and Vietnam, as well as joint participation of the US and Moldova scientists in the edition of this book. The writing of one of its Chapters testifies to the unifying effect of science. An interested reader will find in the book the description of properties and applications employing organic and inorganic materials such as different polymers, oxides and semiconductors, as well as the methods of fabrication and analysis of operation and regions of application of modern optoelectronic devices.

Undo It Yourselfers looking to salvage hidden treasures or repurpose old junk. Author Ed Sobey will show you how to safely disassemble more than 50 devices including Laser Printer, Radio Controlled Car, Zip Drive, Videocassette Recorder, Paper Shredder, Audiocassette Player, Electric Drill, Computer Mouse, Keyboard, Fax Machine, Joystick, Floppy Drive, Videocassette Camera, Electric Clock and More. Each deconstruction project includes a treasure cache of the components to be found, a required tools list and step by step instructions with photos on how to extract the working components. It also includes suggestions on how to repurpose your electronic finds. Why pay good money to an electronics store when you probably already have what you need in that old VCR, printer or hair dryer? Fight the mindset of planned obsolescence; there's technological gold in that there junk.
