

E. How many electrons are in Mg^{2+} ?

10

Activity B:

Electron arrangements

Get the Gizmo ready:

- Create a neutral hydrogen atom (1 proton, 0 neutrons, 1 electron).

Question: How are electrons arranged around the nucleus of an atom?

1. **Observe:** Add electrons to the atom until you have used all the available electrons. How are the electrons arranged?

They are not overlapping and are moving in circular orbits around the nucleus.

2. **Analyze:** Electrons are arranged in orbits called **energy levels**. The Gizmo shows all of the first two energy levels but only part of the third energy level.

A. How many electrons can fit in the first energy level?

2

B. How many electrons can fit in the second energy level?

8

C. How many electrons fit in the part of the third energy level shown?

8

3. **Observe:** Click **Reset** (↺). The electrons in the outermost orbit, called **valence electrons**, help to create chemical bonds. Create a lithium atom (3 protons, 4 neutrons, 3 electrons).

How many valence electrons are in a neutral lithium atom?

1

4. **Diagram:** Turn on **Show electron dot diagram**. The valence electrons of an atom are shown in an **electron dot diagram**. Each dot represents a valence electron. 🖋️ Draw the electron dot diagram for neutral lithium: (Right Click on the element, click "edit", move the dots around Li)

5. **Practice:** Turn off **Show electron dot diagram**. Use the Gizmo to create a neutral atom of each of the following elements. 🖋️ Draw the electron dot diagram for each: (Right Click on the picture, click "edit", move the dots around the element symbols) When you are finished, turn on **Show electron dot diagram** and check your answers.

6. **Extend your thinking:** Many chemical properties are determined by the number of valence electrons. Elements with the same number of valence electrons will have similar properties.

Which element has similar properties to lithium?

Na

Beryllium?

Mg

Explain:

Their valence electron count is same.

How to Create World Class

Teacher Compensation Allan Odden,2008 This presentation is based on the following principles 1 The key accountability for schools is to improve student performance 2 Teachers in the classroom including those in hard to staff fields such as math and special education and their instructional practice are the single most important factors that will lead to improved student performance 3 Teacher compensation is the single biggest part of the education budget often more than 60% 4 Therefore linking pay to teacher performance instructional practice that produces student learning gains is the best way to expend money in a way that ultimately improves student performance This book shows how the connections among those principles are playing Web ed Developing Natural Curiosity through Project-Based Learning Dayna Laur,Jill Ackers,2017-02-17

Libraries Rosalind Kincaid,AI,2025-02-28 Corporate Libraries explores the crucial role of business libraries and knowledge management in driving organizational success through corporate learning It argues that integrating these functions transforms companies into learning organizations enhancing decision making and providing a competitive edge The book highlights how business libraries often viewed as cost centers should be seen as strategic investments especially with the rise of digital technologies The book s approach is to first introduce core concepts then delve into practical implementation aspects like information architecture and user engagement and finally discuss measuring impact and continuous improvement Case studies illustrate real world applications It emphasizes aligning knowledge management with HR and strategic planning offering practical guidance for professionals in various roles to enhance organizational learning and innovation The book progresses from foundational concepts to practical applications offering a holistic perspective that emphasizes the importance of aligning business libraries and knowledge management with the organization s overall learning strategy It offers insights into how organizations can foster a culture of continuous learning by providing timely access to relevant information and facilitating the sharing of internal expertise *The Worlds Educators Create* Matthew A.

Clay,2023-03-20 The connection between place and education has always been complicated and in recent decades has mostly been ignored during the standardization era of education This book provides a different lens to view this connection between place and education as one that is not optional but inherent to all education Furthermore place is looked at not as an ingredient in educational practice but as an outcome of education Instead of merely considering how communities and

landscapes can be incorporated into teaching practices The Worlds Educators Create explores how educators can contribute toward the creation and meaning of the places themselves By incorporating lenses from many fields of study this book aims to create a unifying perspective of place beneficial for educators across content areas and grade levels In so doing educators are able to see the true impact of their work in shaping the places around them Ultimately The Worlds Educators Create calls for education to not merely occur in places but contribute toward making the places themselves more just and equitable
