Jason Martin, 2019-10-21 Quality management is an established widespread and well researched management concept Yet surprisingly little research can be found on understanding the potential for action that is required in order to perform quality management work The field of quality management has a strong emphasis not only on a customer and supplier focus external but also on a process focus internal This creates a constant challenge in the way in which quality management is conceived and realised Another challenge is reflected in current research that describes the need for conceptual change in quality management due to extensive ongoing changes in society and the business environment The nature and pace of technological development coupled with changes in social behaviour continuously bring out new customer needs and new ways for customers to interact with the producers of goods and services This requires adaptive and innovative approaches for organisations in order to stay competitive and relevant This thesis uses competence based and practice based perspectives to better understand the requirements placed on quality management in meeting these challenges It investigates what quality management work is and what properties must exist in terms of competence and practice in order to make quality management work possible The purpose of this thesis is therefore to explore how the theoretical perspectives of competence and practice can contribute to an increased understanding of what is required to perform quality management work Three research questions are posed and answered The first research question concerns the nature of quality management work and how its key factors may be characterised the second research question deals with competencies of quality management and how these are interrelated with quality management work the third research question concerns how the interplay between quality management competencies can be understood The research questions are answered by interpreting the findings of five papers included in the thesis using a conceptual framework The results of the thesis suggest two main directions of quality management work expansive and adaptive quality management work Expansive work is characterised by explorative practice radical change to existing processes or the development of new processes a logic of development an orientation towards development and innovation a striving to increase external efficiency and a striving to increase process variation Adaptive work is characterised by exploitative practice incremental change to existing processes a logic of performance an orientation towards goals and productivity a striving towards internal efficiency and a striving to decrease process variation Quality management competencies relate to quality management work in combining role dependency and discretion Role dependency signifies the potential and capability to assume multiple role responsibilities Discretion is the freedom of movement for quality practitioners to engage in practices and choose quality management work directions according to task and situation The interplay between quality management competencies is understood as the combined effects of two competence antecedents individual and or collective dispositions to change and learning This thesis extends research on quality management by increasing our knowledge and understanding of the requirements needed not only to select and

perform existing quality management practices but also to adopt and engage in practices where emergence is accommodated by ambidexterity. Kvalitetsutveckling är ett etablerat utbrett och välbeforskat managementkoncept. Trots detta går det att hitta flera alternativ till lite forskning vilken fokuserar på en kadefrånsettelse för de handlingsformerna som faktiskt krävs för att utföra kvalitetsutveckling. Som koncept skiljer sig kvalitetsutveckling i sitt dubbla fokus på både ett internt processrelaterat innehåll och ett externt kundfokuserat innehåll. Detta skapar en konstant utmaning för hur kvalitetsutveckling kan framskrida och omförför praktiker. En annan utmaning som beskrivs i forskningen är behovet av konceptuell förändring som krävs i kvalitetsutveckling för att man ska kunna sammanföra och marknadsmissa förändringar. Hastigheten och innehållet i den tekniska utvecklingen samt förändringar i sociala beteenden utvecklar hela tiden nya kundbehov och nya sätt att interagera med leverantörer av varor och tjänster. Detta kräver anpassningsinriktade och innovativa förhållningssätt för organisationer att vara relevanta samt att kunna bibehålla och öka konkurrenskraften. Kompetensteoretiska och praktikteoretiska perspektiv används i avhandlingen för att belysa de krav som kan ställas på modern kvalitetsutveckling i att man ska dessa utmaningar. Avhandlingen undersöker vad modern kvalitetsutveckling är och vilka egenskaper som måste finnas i termer av kompetens och praktik för att möjliggöra att modern kvalitetsutveckling utförs. Syftet med denna avhandling är således att utforska hur kompetensteoretiska och praktikteoretiska perspektiv kan bidra till en kadefrånsettelse för vad som krävs för att utföra kvalitetsutvecklingsarbete. Tre olika forskningsfrågor behandlas. Den första forskningsfrågan handlar om vad kvalitetsutvecklingsarbete är och hur det kan karaktäriseras i termer av nyckelfaktorer. Den andra forskningsfrågan berör kompetenser för kvalitetsutveckling och hur dessa kan kopplas till arbete med kvalitetsutveckling. Den tredje forskningsfrågan handlar om hur samspelet mellan kompetenser för kvalitetsutvecklingsarbete kan framskrida. Forskningsfrågorna besvaras genom att tolka de empiriska resultaten i fem bilagda artiklar utifrån ett konceptuellt ramverk. Avhandlingens resultat visar på två huvudsakliga inriktningar på innehållet i kvalitetsutvecklingsarbete: expansivt och adaptivt kvalitetsutvecklingsarbete. Nyckelfaktorer i expansivt arbete är explorativ praktik, radikal förändring av existerande processer eller utveckling av nya processer, utvecklingslogik, utvecklings- och innovationsorientering, extern effektivitet samt knäring av processvariation. Nyckelfaktorer i adaptivt arbete är exploitativ praktik, inkrementell förändring i existerande processer, prestationslogik, mål och produktivitetsorientering, intern effektivitet samt att minska och styra processvariation. Kopplingen mellan kompetenser för och arbetet med praktiker i kvalitetsutveckling utgörs av en potential för rollberoende och handlingsfrihet. Rollberoende beskriver en individuell och eller kollektiv kapacitet att kunna tillgripa sig samt byta mellan olika definierade rollansvar. Handlingsfrihet beskriver kapaciteten att kunna välja inriktning på innehållet i arbetet beroende på uppgift och situation. Samspelet mellan kompetenser för kvalitetsutvecklingsarbete kan beskrivas som den samlade effekten av två förutsättningar: engagemang och antecedent för kompetens, individuell och eller kollektiv benägenhet för förändring och lärande. Avhandlingens resultat bidrar till forskningen om kvalitetsutveckling på två huvudsakliga sätt. Dels genom att öka kunskap och frånsettelse för de krav som ställs på att välja och

presterade existerande kvalitetsutvecklingspraktiker Dels genom att ka f r st elsen om hur anpassning och ut vande av dessa praktiker g r till d r framv xandet av praktiker stimuleras genom att m jligg ra organisatorisk ambidextri

Approaches to Language: Data, Theory, and Explanation Ángel J. Gallego, Aritz Irurtzun, 2020-12-24 The study of language has changed substantially in the last decades In particular the development of new technologies has allowed the emergence of new experimental techniques which complement more traditional approaches to data in linguistics like informal reports of native speakers judgments surveys corpus studies or fieldwork This move is an enriching feature of contemporary linguistics allowing for a better understanding of a phenomenon as complex as natural language where all sorts of factors internal and external to the individual interact Chomsky 2005 This has generated some sort of divergence not only in research approaches but also in the phenomena studied with an increasing specialization between subfields and

The Space between Look and Read Susan M. Hagan,2023-04-18 Unleashing the potential that can be found in the space between words and images Designers have long understood that image text and typeface can work together to produce new meanings creating semiotic registers impossible to achieve with image or text alone In The Space Between Look and Read a study of complementary meaning in design Susan Hagan presents a framework called Inter play which explains how these new meanings emerge Inter play is not simply an analytical tool it is also a method for using complementary meaning to encourage critical thinking in design audiences Drawing from cognitive psychology art theory discourse analysis design and rhetoric Hagan breaks down the synthesis of looking and reading into a complex series of registers which are revealed through examples of excellent design Thus the book is both a theoretical exploration of how designers communicate and a casebook in communication well achieved From the physiology of vision to the limits of language from Allan Paivio to Uwe Loesch The Space Between Look and Read expands our understanding of complementary design and argues that by engaging audiences through multiple cognitive registers complementary design serves as a cognitive tool helping audiences reach new conclusions about complex problems
