An Outline of Scientific Writing Jen Tsi Yang,Janet N. Yang,1995 This book is aimed at researchers who need to write clear and understandable manuscripts in English Today English is the official language of international conferences and most important publications in science and technology are written in English Therefore learning how to write in English has become part of the researcher s task The book begins by discussing constructs of the English language such as sentence structure and word use It then proceeds to discuss the style and convention used in scientific publications

This book is written at such a level that the reader should not have to resort to a dictionary. It includes many examples and exercises to clarify the rules and guidelines presented. Topics covered in this book include word choice, how to avoid redundancy, sentence and paragraph structure, the planning of a manuscript, format, nomenclature and style, how to present attractive figures and tables, references, how to prepare a manuscript for publication, submission to a journal, and checking of proofs and some standard abbreviations and symbols.

Biomedical Research G. Jagadeesh, 2019-01-01 Specially designed for aspiring researchers, this book presents a systematic exposition of the basic principles and methodologies involved in biomedical research. The book covers the entire research process from the conception of an idea, its development, investigation, and execution, and finally to its publication. Various research methodologies, including study design and statistical approaches to data analysis, are also discussed in detail. The importance of ethics and integrity in research is highlighted extensively. In addition, the book discusses relevant issues relating to the commercialization of research innovations and outlines the steps necessary for successful entrepreneurship.

Using the Biological Literature Diane Schmidt, 2014-04-14 The biological sciences cover a broad array of literature types, from younger fields like molecular biology, with its reliance on recent journal articles, genomic databases, and protocol manuals, to classic fields such as taxonomy, with its scattered literature found in monographs and journals from the past three centuries.

Linguistic Variation in Research Articles Bethany Gray, 2015-12-15 Linguistic Variation in Research Articles investigates the linguistic characteristics of academic research articles, going beyond a traditional analysis of the generically defined research article to take into account varied realizations of research articles within and across disciplines. It combines corpus-based analyses of 70 linguistic features with analyses of the situational or non-linguistic characteristics of the Academic Journal Registers Corpus 270 research articles from 6 diverse disciplines: philosophy, history, political science, applied linguistics, biology, physics, and representing three sub-registers: theoretical, quantitative, and qualitative research. Comprehensive analyses include a lexical/grammatical survey, an exploration of structural complexity, and a Multi-Dimensional analysis, all interpreted relative to the situational analysis of the corpus. The finding that linguistic variation in research articles does not occur along a single parameter like discipline is discussed relative to our understanding of disciplinary practices, the multidimensional nature of variation in research articles, and resulting methodological considerations for corpus studies of disciplinary writing.

Professional Writing in Kinesiology and Sports Medicine Mark Knoblauch, 2024-06-01 Publication of a research article can be a defining moment in a researcher's career. However, the steps involved in turning an initial research question into a published article can be a long and arduous journey. To aid in this process, *Professional Writing in Kinesiology and Sports Medicine* was developed to serve as a comprehensive writing guide for research professionals and students who are looking to improve their academic writing skills. Dr. Mark Knoblauch and his 15 contributors developed *Professional Writing in Kinesiology and Sports Medicine* to focus around the area of manuscript

development and presentation while also including chapters that outline the foundational concepts of professional writing developing a research grant and the journal selection process Each chapter is written by content experts who bring a wealth of experience not only from their own academic writing but also from having spent countless hours helping students become better more effective writers Many textbooks have been written that focus on development of the research manuscript itself but what sets Professional Writing in Kinesiology and Sports Medicine apart is that it includes so much more to aid writers in their process What you can find inside Examination of ancillary aspects associated with academic research such as poster and oral presentations How to choose the most effective journal How to deal with the stress of writing How to write an effective grant Professional Writing in Kinesiology and Sports Medicine covers those topics and more with the intent of providing a thorough practical writing guide that spans the breadth of the research manuscript development writing and presentation process Throughout the textbook sample writings and cases relevant to the fields of kinesiology and sports medicine are used to provide the reader relevant applicable examples to help improve their own writing
