the development of the persuasive potential of headlines and advertisements right down to the sophisticated postmodernist and multilingual examples of today Other topics are the definition and structure of news stories and commentaries the interpersonal and multi modal aspects of talkshows and more radically the questioning of the journalist s role in the age of the internet Generally the stress is on the attention getting side of media texts rather than on the manipulative qualities investigated by critical discourse analysis

Autocar ,2003 Adult Catalog: Subjects Los Angeles County Public Library,1970 Smart Thinking Tony Lewin,2004 The story of smart is an epic tale of genius inspiration hope disappointment disaster and ultimate triumph Funky stylish and fun smart is the youngest and most exciting brand of car on the market and it has revolutionised the way we think about cars and the way we use them It has put much needed fun back into driving and even city motorists smile when they re at the wheel of a smart But it nearly didn t happen atall The revolutionary design was the product of the genius who invented the Swatch watch saving the near bankrupt Swiss watch industry in the process But these visionary ideas proved too radical and the tiny two seater almost died at birth when a succession of backers lost their nerve The sensational story of smart traces the decade long history of this ambitious project talking to key figures from every stage of the programme and building a vivid picture of an idea ahead of its time

Design Driven Innovation Roberto Verganti,2009-08-12 Until now the literature on innovation has focused either on radical innovation pushed by technology or incremental innovation pulled by the market In Design Driven Innovation How to Compete by Radically Innovating the Meaning of Products Roberto Verganti introduces a third strategy a radical shift in perspective that introduces a bold new way of competing Design driven innovations do not come from the market they create new markets They don t push new technologies they push new meanings It s about having a vision and taking that vision to your customers Think of game changers like Nintendo s Wii or Apple s iPod They overturned our understanding of what a video game means and how we listen to music Customers had not asked for these new meanings but once they experienced them it was love at first sight But where does the vision come from With fascinating examples from leading European and American companies Verganti shows that for truly breakthrough products and services we must look beyond customers and users to those he calls interpreters the experts who deeply understand and shape the markets they work in Design Driven Innovation offers a provocative new view of innovation thinking and practice
