too liberal. (This is a general principle of decision making. It is better to be
 conservative than to be liberal. It is better to be conservative than to be liberal.)

This data assessed the speed-accuracy trade-off theory. This is because the participants were more likely to respond at a slower rate when they were uncertain about the correct answer. This is consistent with the speed-accuracy trade-off theory, which suggests that participants will sacrifice speed for accuracy when they are uncertain about the correct answer.

- After calculating your percentage from the nine answers you gave, take a look at your score. You should have answered the following questions correctly:

Bulletin ,1966 Autophagy in plants and algae Diane C Bassham, Jose L Crespo, 2015-05-15 Autophagy also known as
macroautophagy is an evolutionarily conserved process by which cytoplasmic components are nonselectively enclosed within
a double membrane vesicle known as the autophagosome and delivered to the vacuole for degradation of toxic components
and recycling of needed nutrients This catabolic process is required for the adequate adaptation and response of the cell and
correspondingly the whole organism to different types of stress including nutrient starvation or oxidative damage Autophagy
has been extensively investigated in yeasts and mammals but the identification of autophagy related ATG genes in plant and
algal genomes together with the characterization of autophagy deficient mutants in plants have revealed that this process is
structurally and functionally conserved in photosynthetic eukaryotes Recent studies have demonstrated that autophagy is
active at a basal level under normal growth in plants and is upregulated during senescence and in response to nutrient
limitation oxidative stress salt and drought conditions and pathogen attack Autophagy was initially considered as a non
selective pathway but numerous observations mainly obtained in yeasts revealed that autophagy can also selectively
eliminate specific proteins protein complexes and organelles Interestingly several types of selective autophagy appear to be
also conserved in plants and the degradation of protein aggregates through specific adaptors or the delivery of chloroplast
material to the vacuole via autophagy has been reported This research topic aims to gather recent progress on different
aspects of autophagy in plants and algae We welcome all types of articles including original research methods opinions and
reviews that provide new insights about the autophagy process and its regulation Science John Michels (Journalist), 1992
