Jane's All the World's Aircraft ,2009 **Vice and Psychiatric Diagnosis** John Z. Sadler, 2024-02-28 Vice and Psychiatric Diagnosis begins with the simple question of why some categories of mental disorder include immoral or criminal conduct as diagnostic features while most mental disorders in the DSM and ICD do not involve such vice laden concepts While this initial puzzle seems to concern only the limited domain of psychiatric nosology Sadler's expansive scholarship reveals that this simple question leads inexorably to complex questions about the role of madness and morality in intellectual history and to today's many conflicts and contradictions in the policy and culture of mental health criminal justice and related social welfare efforts The book outlines the implications of vice concepts being incorporated into psychiatric diagnosis and clinical practice leading to some of the vexing problems in mental health and social care These issues include the fragmentation of care in social welfare efforts involving mentally ill people criminal offenders intellectually disabled individuals and juvenile offenders The analysis extends to cultural attitudes and policies as well the insanity defense managing the mentally ill criminal offender the value of punishment in criminal justice and derivative issues such as the ethics of forensic psychiatry the growing problem of mass shootings stigma health literacy and the difficulties in pursuing rigorous and consistent approaches to psychiatric diagnostic classification In the pursuit of untangling these threads of vice and psychiatric diagnosis Sadler provides a brief history of ideas about madness and morality beginning in prehistory and extending into the late 20th century The lessons from this history are applied in subsequent chapters examining the vice mental disorder relationship from the perspectives of philosophical conceptual issues the perspectives of criminal law and the criminal justice system and the perspectives of public interest and public opinion The concluding chapters formulate an alternative way of thinking about the vice mental disorder relationship in clinical practice and public policy culminating in Forty Theses which present the detailed conclusions and social implications for this monumental work **Scientific and Technical Aerospace Reports** ,1978
