what And especially helpful are the steps Ms Nichols Poulos employs to set up a behavior management plan that works She explains the strategic steps she takes before school starts how essential it is to get to know each student before they walk into class on that first day She also illustrates how setting up classroom routines helps students know what to expect and how to make the best use of every minute And she emphasizes the importance of the parent student teacher team and includes many examples of how to communicate with and involve parents even those who may be difficult Foundational to her program are reading and writing Among other things she lays out the steps for students even as early as fourth grade to write five paragraph essays and their own student authored books and to research and write reports that include bibliographies When she differentiated curriculum to support all students needs she found their learning accelerated All teachers will appreciate her ideas about how to teach the basics of math as well as advanced math concepts And her ideas for teaching the arts are inspirational as she describes in detail how her fourth graders performed Shakespeare s Hamlet Macbeth King Lear Julius Caesar and A Midsummer Night s Dream She also shows how to integrate social studies with literature and writing Her experiences taught her that young students are much more capable than many people realize The Conscious Teacher is an indispensable guide for all new teachers Many of the ideas Ms Nichols Poulos provides will also be an eye opener for parents and experienced teachers as well The Conscious Teacher is simply a must have for anyone truly interested in giving young children a positive and solid foundation for their later schooling *Access, Opportunity, and Success* Martha E. Casazza, Laura L. S. Bauer, 2006-01-30 Behind the hallowed walls of higher education are students who did not grow up expecting to attend college students who walked through open doors not knowing what to expect on the other side For some these open doors became revolving doors and they simply gave up For many others however there were unexpected successes successes that included more than academic accomplishments These people came through the system with an increased sense of self confidence that empowered them in the world beyond college This oral history tells the story of the struggles as well as of the triumphs related to the fight for access and high quality in higher education Thus it provides a unique look at the past state of higher education and at the measures that might be taken to improve our future educational system The book begins with a brief historical overview of what access to higher education looked like before the 20th century Following chapters tell the actual stories and are organized around four themes the power of belief in students access with success institutional commitment and effective support systems Finally a set of recommendations is provided that will help to keep the doors open for those still wishing to enter Educators at all levels graduate students studying higher education and interested readers in the general public will all find this book an invaluable resource **The Well-Trained Mind** Susan Wise Bauer, Jessie Wise, 2016-08-09 Is your child getting lost in the system becoming bored losing his or her natural eagerness to learn If so it may be time to take charge of your child s education by doing it yourself The Well Trained Mind will instruct you step by step on how to give your child an academically rigorous comprehensive education from

Ground Up Michele A. Acker-Hocevar, Marta I. Cruz-Janzen, Cynthia L. Wilson, 2012-01-01 This book chronicles the journey of seven schools serving students of poverty English Language Learners ELLs and students of color which were able to sustain school improvement for a decade on either state and or national criteria that measure student performance outcomes The book shares stories of these seven schools and demonstrates that it takes an entire school working together with their communities adding to the social and cultural capital of their students and families to create and nurture what we call a Learning Partnership for sustainable school improvement The answers for how these schools sustained school improvement and are effective schools is evident from their school student metrics that validate the school s ability to meet and sustain external mandates of high performance over time The seven individual case stories illustrate that what matters most is what happens in the school itself It is the internal culture of caring and respecting each other and working from an additive perspective of valuing students for their unique gifts and abilities rather than exclusively focusing on increasing test scores that makes these school stories unique This is not about heroic leadership but leadership spread out and shared among professionals working together to achieve common goals around shared values and beliefs This book is about using resources in ways that value human capital as the greatest asset in the school to ensure that educators feel a sense of commitment connection and passion for their work together with students their families and their communities that enable them to excel together We offer readers seven cases that demonstrate there is no cookie cutter approach to having an effective school Rather there is a theory in practice that grounds the Learning Partnership depicted as a tree within a sustainable school improvement culture This sustainable culture connects shared leadership and accountability resourcefulness a humanistic philosophy additive schooling and results in an organization synergy that sustains organizational and collective efficacy for achieving results in these schools that other educators in schools with similar demographics are often unable to sustain or attain
