edited volume provides deep insight into theoretical and empirical evidence on how digital technologies and high tech brands are interrelated. It traces the mutual links between these two phenomena, identifies the multidimensionality of interdependencies and shows the reader how and why new technologies are the driving factors of creation and global dissemination of high tech brands. In this context it also refers to various types of economic and social networks that on the one hand are the products of digital technologies while on the other enforce global visibility of high tech brands. The book contributes to the present state of knowledge offering the reader broad evidence on how digital technologies impact the process of high tech brands' nascence and how their growing role and global exposure influence networked economies and societies. It sets out to deliver a bridge between brand management and economical approaches to understanding how digital technologies and high tech brands are interrelated. This multidisciplinary approach creates a complex compilation of different views and perspectives that sheds new light on the high tech brands phenomena of being an input and output of technology driven economies. *Technology Brands in the Digital Economy* is written for scholars and researchers from a wide variety of disciplines but especially for those addressing issues of brands and economic development and growth, social development and the role of technological progress in broadly defined socio-economic progress. It will also be an invaluable source of knowledge for graduate and postgraduate students in a variety of areas such as economic and social development, information and technology, worldwide studies, social policy and comparative economics.

Competitive Strategies for Academic Entrepreneurship: Commercialization of Research-Based Products Szopa, Anna, 2015-09-21. In recent years the pace of technological growth from the very first stages of research and development to full scale industrial implementation has quickened at an exponential rate. To better keep pace with rapidly changing market demands the gap between university research incubators and public sector start up companies has undergone a marked contraction. *Competitive Strategies for Academic Entrepreneurship: Commercialization of Research Based Products* seeks to fill the gap in research between universities and the public and offers cutting edge insight into the current state of the field. Charting a course that moves from discussions of academic resistance and implications for knowledge transfer theory to current case studies of academic industrial launch pads like COTEC's Technology Commercialization Accelerator and the Maryland Industrial Partnerships program, this publication targets an audience of academicians, administrators, researchers, entrepreneurs and established professionals and seeks to provide insight into the mechanisms by which the research of today becomes the household names of tomorrow.

The Oxford Handbook of Innovation Management Mark Dodgson, David M. Gann, Nelson Phillips, 2013-12-19. The Oxford Handbook of Innovation Management

offers a comprehensive and timely analysis of the nature and importance of innovation and the strategies and practices that can be used to improve organizational benefits from innovation. Innovation is centrally important for business and national competitiveness and for the quality and standard of living around the world but it does not happen by itself. For innovation to succeed it needs to be properly managed. With contributions from 49 world leading scholars the Handbook explores the many sources of innovation the broader social economic and technological contexts that encourage and constrain it and the cutting edge strategies and practices of innovation management. The book addresses the traditional concerns of innovation management such as managing R D intellectual property and creativity and the contributions of science and marketing but substantially extends traditional areas of interest. In this new volume chapters examine emerging topics including design social networks open and social innovation and innovation in business models ecosystems services and platforms. The book explores the importance of innovation management for environmental sustainability and its evolving nature and practice in Asia. Written in an accessible style and with carefully selected bibliographies and a comprehensive index the Handbook offers a uniquely authoritative and wide ranging source of knowledge about innovation management. Each chapter identifies key issues and reviews the most important research findings. Future research questions are identified. The Handbook will be invaluable for students and faculty studying researching and teaching innovation and for managers seeking to improve innovation outcomes in their organizations.
