Pitfall Christopher Pollon, 2024-01-30 A compelling investigation into the global race to exploit our world's dwindling natural resources In order to transition to clean energy in the coming decades billions of tons of copper nickel silver and other metals will be required to build electric vehicles and green infrastructure and power smart technology We need more metals than ever before yet the qualities and quantities are diminishing making the extraction process more polluting to land air and water And most of these metals will be mined from the global south where social conflict will only grow led by Indigenous peoples demanding a greater say in how their wealth is used In Pitfall investigative journalist Christopher Pollon charts how transnational companies have controlled copper precious metals and lithium mining in Latin America made inroads into war torn countries in Africa and extracted nickel industrial and rare earth metals across Australia Asia and the Pacific Industry attention is now moving to deeper and darker places including the depths of the ocean sacrifice zones and near Earth asteroids The stakes couldn't be higher How can we mine the metals we need without replicating the environmental and human rights abuses of the past

New South African Review 5 Gilbert M Khadiagala, Devan Pillay, Roger Southall, Prishani Naidoo, 2015-11-01 A series of essays explaining the impact of the events at Marikana upon the South African perspective of police and the keeping of order This fifth volume in the New South African Review series takes as its starting point the shock wave emanating from the events at Marikana on 16 August 2012 and how it has reverberated throughout politics and society Some of the chapters in the volume refer directly to Marikana In others the influence of that fateful day is pervasive if not direct Marikana has for instance made us look differently at the police and at how order is imposed on society Monique Marks and David Bruce write that the massacre has come to hold a central place in the analysis of policing and broader political events since 2012 The chapters highlight a range of current concerns political economic and social David Dickinson's chapter looks at the life of the poor in a township from within In contrast the chapter on foreign policy by Garth le Pere analyses South Africa's approach to international relations in the Mandela Mbeki and Zuma eras Anthony Turton's account When gold mining ends is a chilling forecast of an impending environmental catastrophe Both Devan Pillay and Noor Nieftagodien focus attention on the left and in different ways ascribe its rise to a new politics in the wake of Marikana The essays in NSAR 5 Beyond Marikana present a range of topics and perspectives of

interest to general readers but the book will also be a useful work of reference for students and researchers *Life after Gravity* Patricia Fara, 2021-02-24 The story of Isaac Newton's decades in London as ambitious cosmopolitan gentleman President of London's Royal Society Master of the Mint and investor in the slave trade Isaac Newton is celebrated throughout the world as a great scientific genius who conceived the theory of gravity But in his early fifties he abandoned his life as a reclusive university scholar to spend three decades in London a long period of metropolitan activity that is often overlooked Enmeshed in Enlightenment politics and social affairs Newton participated in the linked spheres of early science and imperialist capitalism Instead of the quiet cloisters and dark libraries of Cambridge's all male world he now moved in fashionable London society which was characterized by patronage relationships sexual intrigues and ruthless ambition Knighted by Queen Anne and a close ally of influential Whig politicians Newton occupied a powerful position as President of London's Royal Society He also became Master of the Mint responsible for the nation's money at a time of financial crisis and himself making and losing small fortunes on the stock market A major investor in the East India Company Newton benefited from the global trading networks that relied on selling African captives to wealthy plantation owners in the Americas and was responsible for monitoring the import of African gold to be melted down for English guineas Patricia Fara reveals Newton's life as a cosmopolitan gentleman by focussing on a Hogarth painting of an elite Hanoverian drawing room Gazing down from the mantelpiece a bust of Newton looms over an aristocratic audience watching their children perform a play about European colonialism and the search for gold Packed with Newtonian imagery this conversation piece depicts the privileged exploitative life in which this eminent Enlightenment figure engaged an uncomfortable side of Newton's life with which we are much less familiar **Relics** Jamie Grove, Max Grove, Mini Museum, 2021-10-26 Four billion years in the palm of your hand Relics A History of the World Told in 133 Objects is the story of our planet as you've never seen it before The Mini Museum is a collection of treasures gathered from across space and time shared by tens of thousands of people in more than 120 countries Each item in the collection is a story connected to a childhood dream of sharing all the wonders the universe has to offer while bringing all of us closer together In this book the Mini Museum team shares the stories of real objects that have shaped our very existence across billions of years of history Beginning with the birth of our solar system and the very building blocks of life you'll explore our dynamic planet from the constant shifting of continents to dramatic and violent upheavals which have changed the course of all life again and again You'll visit mighty civilizations with cultures spanning millennia as well as modern symbols of creativity and innovation and the march of humanity as we reach toward the stars Every item is photographed and presented in detail There are also wild tales of adventure as the crew travels the world and prepares one of the most complex collections ever assembled Anthropology of Precious Minerals Elizabeth Ferry, Annabel Vallard, Andrew Walsh, 2020 Based on a Wenner Gren international workshop held at the Royal Ontario Museum this book addresses the complexity of human mineral engagements through ethnographic case studies and anthropological reflections

on different people and the minerals they deem precious Money Counts Mario Schmidt, Sandy Ross, 2020-01-16 Traditionally viewed as an abstraction the quantitative nature of money is essential in evaluating the relationship between monetary systems and society Money Counts moves beyond abstraction exploring the conceptual diversity and everyday enactment of money's quantity Drawing from case studies including British jewelers blood money payments in Germanic law codes and the quotidian use of money in cosmopolitical Moscow a Western Kenyan village and socialist Havana the chapters in this volume offer new theoretical and empirical interpretations of money's quantitative nature as it relates to abstraction sociality materiality freedom and morality **The Water Legacies of Conventional Mining** James E. Nickum, David B. Brooks, Anthony Turton, Surina Esterhuyse, 2018-10-15 The impact of mining is too big to ignore in a world of oversubscribed water This is true of conventional mining as much as or even more than hydraulic fracturing fracking The legacy issues of such mining on water have not been fully appreciated especially the irretrievable effects mining has had on communities and ecosystems around the world through its impact on water Yet this is not an us or them problem the wealth influence and technical knowledge of mining interests can and must be part of the solution All of the contributions to this volume either consider the deficiencies of existing governance structures and the need for better ones or explore the use of new techniques to identify and evaluate social and environmental impacts The chapters in this book were originally published in the journal Water International **Drought Policies: Case Studies on Mega-droughts for the High Level Experts and Leaders Panel on Water and Disasters (HELP)** Jerome Delli Priscolli, Kenzo Hiroki, 2019-11-15 This book focuses on mega droughts of the past 20 years Twelve cases from both developed and developing countries are elaborated in the book Its intention is to draw lessons from the cases of extremely severe water shortages so that countries and stakeholders can be better prepared for extreme drought events in the future Several recurrent themes emerge from the diverse case studies and descriptions of programs For example most chapters discuss the necessity to move from reactive compensatory to preventive policies This theme has implications for use of insurance in developing countries e.g. is insurance encouraging investments to help countries avoid disasters or is it acting mostly in a humanitarian way to compensate for losses to help people Several authors point to the importance of risk assessment and to developing risk based policies for drought This raises statistical issues of how such assessments of uncertainty and risks are done and how they relate to actual occurrence of events Most chapters call for more inter sectoral policies policies which integrate water resources management approaches and to the necessity of raising public awareness of droughts in times of no drought The issue of structural versus nonstructural is clear in most cases While often cast as either or the message that emerges is more one of how do you integrate these approaches Finally a few chapters bring to light how prevention is needed for national security as well as water security In Focus a book series that showcases the latest accomplishments in water research Each book focuses on a specialist area with papers from top experts in the field It aims to be a vehicle for in depth understanding and inspire further conversations in the sector

Die Goldproduktion der letzten 50 Jahre Bernd Kröger, 2017-10-27 Goldproduktion die letzten 50 Jahre beschreibt die Entwicklung der weltweiten Goldproduktion seit Aufhebung des fixierten Goldpreises im Jahr 1968. Seit der Goldpreis mit Angebot und Nachfrage schwankt, hat sich eine rasante Erhöhung und Verschiebung der Goldproduktion ergeben. Südafrika der einstige Champion, fiel dramatisch zurück, andere Länder der USA, Kanada, Australien, Russland und vor allem China übernahmen die Führung. Abhängig vom Goldpreis ergaben sich fünf große Produktionszyklen. Mit Erreichen eines Allzeithochs des Goldpreises lief der vierte Zyklus 2012 aus. Wir befinden uns mitten im fünften Zyklus, der mit einem Preisrückgang von 30% begann. Der Autor behandelt im Detail die Entwicklung der großen Förderländer und die dort wichtigen Goldbergbaugesellschaften. Eine Übersicht über die Geschichte der fünfzehn Goldproduktionsländer sowie ein umfangreicher Index der behandelten Minen runden die Darstellung ab.

Die Natur hat Recht Elisabeth Weydt, 2023-09-21 Eine revolutionäre wie zukunftsweisende Ansicht im Klima- und Artenschutz. Die Welt steht kurz vor dem ökologischen Kollaps und uns bleibt kaum noch Zeit, die Richtung zu ändern. Wir müssen sehr schnell sehr viel ändern. Eine vielversprechende Lösungsmöglichkeit liegt deshalb in unseren Rechtssystemen. Die Journalistin Elisabeth Weydt hat in verschiedenen Ländern recherchiert und berichtet in dieser eindrücklichen Reportage von einer so radikalen wie zukunftsweisenden Idee, die eine Wende für den Natur- und Artenschutz darstellen könnte. Ecuador beispielsweise macht vor, wie Umweltschutz in Zeiten der dringenden benötigten Energiewende und des damit einhergehenden Wettrennens nach neuen Rohstoffen wie Kupfer, Kobalt und Lithium angegangen werden kann, indem die Natur zum Rechtssubjekt erklärt wird. Packende Reportage und Aufruf zugleich. Durch einklagbare Rechte der Natur erfolgreich gegen Umweltzerstörung vorgehen. Elisabeth Weydts Recherche beginnt im Intag-Tal in Ecuador, dem einzigen Land der Erde, das die Natur in seiner Verfassung zu einer eigenständigen Rechtsperson erklärt hat. Das Konzept beruht auf der Vorstellung, dass wir alle Teil eines großen Ganzen sind, dass der Mensch nicht mehr Rechte hat als die Natur, dass er gar nicht mehr Rechte haben kann als die Natur, schon allein weil er selbst Teil der Natur ist. Diesem revolutionären Ansatz um die Rechte der Natur folgen mittlerweile Initiativen weltweit. Manche kämpfen für die Anerkennung eines einzelnen Flusses, manche für einen Wald, andere für ganze Ökosysteme, und auch hierzulande gibt es eine solche Initiative. Zudem geht Elisabeth Weydt der Frage nach, was Umweltzerstörung in anderen Teilen der Welt mit Deutschland und unserer Lebensweise zu tun hat und inwiefern die ecuadorianischen Prinzipien auf Deutschland übertragbar sind. Fesselnd und informativ beleuchtet Elisabeth Weydt einen revolutionären Ansatz, der eine Wende für den Klimaschutz bedeuten könnte. Eine Reportage, die uns die Augen öffnet und inspiriert für konstruktive Ansätze und mögliche Wege raus aus der Klimakrise.
