

RESISTANCE BAND

WHY USE RESISTANCE BANDS?

Resistance bands allow you to perform strength-training exercises without weights and enable you to complete a full-body workout. Using resistance bands adds variety and intensity to your strength-training exercises. As you work out, resistance is increased throughout the motion, resulting in more endurance and a broader range of motion. Resistance band training can also help you improve stamina and flexibility.

WHAT'S YOUR GOAL?

Increase Muscle Strength
Perform a series of 2-3 resistance exercises for 10-15 seconds between sets.

Increase Muscle Size
Perform a series of 2-3 resistance exercises for 1-2 minutes between sets.

Increase Muscular Endurance
Perform a series of 2-3 resistance exercises for 30-60 seconds between sets.

Squats

Place the resistance band securely under your feet and bring the handles up to chest level, with your arms bent and palms facing backward. Keep your chest up and bend your hips and knees into a squat position until your thighs are parallel to the ground. Rise slowly through your heels back to the start position.

Press-ups

Take a press-up position with the band running around your back and slowly lower your chest to the floor until your elbows reach a 90° angle. Contract your chest and triceps to push back up to the start position.

Chest Presses

Place the band around a solid structure, turn so you are facing away from the structure and place your feet shoulder width apart. Hold a handle in each hand at chest level, and with a forward movement press the handles away from your chest. Hold the position for a second and then slowly return to the start position.

Face Pulls

Place the band around a solid structure and stand facing the structure with your feet shoulder width apart. Hold a handle in each hand, fully extend your arms at chest level and pull the handles towards your face while keeping your elbows high and the position for a second and then slowly return to the start position.

Shoulder Presses

Place the resistance band securely under your feet and bring your hands up to shoulder level, with your palms facing forward. Press the band above your head, hold this position for a second and then slowly bring your hands down to shoulder level.

Lateral Raises

Place the resistance band securely under your feet and hold the handles by your sides, with your palms facing inward. Slightly bend your arms and then raise them out to your sides until they are parallel to the floor. Hold the position for a second and then slowly return to the start position.

Biceps Curl

Place the resistance band securely under your feet and hold the handles by your sides, with your palms facing forward. Contract your biceps, and then as your elbows, so you can pull the handles towards your chest. Hold the position for a second and then slowly return to the start position.

Triceps Pushdown

Place the band around a solid structure above you and stand facing the band. Hold the handles at chest level with your arms bent and palms facing down. Bend your elbows tucked into your side and press the handles forcefully towards the floor until your arms are fully extended. Hold the position for a second and then slowly return to the start position.

MAXIMISE YOUR WORKOUT!

Warm Up your Core Muscles - Before training, warm up your core muscles through a series of 10-15 sit-ups or planks. This will help to activate your core muscles and improve your overall performance.

Stretching - After your workout, stretch your muscles to help reduce soreness and improve flexibility. Focus on the muscles you used during your workout.

Hydration - Drink plenty of water throughout your workout to stay hydrated and maintain energy levels.

Rest and Recovery - Allow your muscles time to rest and recover between workouts to prevent injury and maximize results.

Consistency - Stick to your workout routine and don't skip days. Consistency is key to seeing results and improving your fitness.

Progressive Overload - Gradually increase the intensity of your workouts to challenge your muscles and promote growth.

Form is Key - Always use proper form to avoid injury and ensure you are targeting the right muscles.

Listen to Your Body - If you feel pain or discomfort, stop the exercise and consult a professional.
