Review of the New York City Watershed Protection Program National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Water Science and Technology Board, Committee to Review the New York City Watershed Protection Program, 2021-01-04 New York City's municipal water supply system provides about 1 billion gallons of drinking water a day to over 8.5 million people in New York City and about 1 million people living in nearby Westchester, Putnam, Ulster, and Orange counties. The combined water supply system includes 19 reservoirs and three controlled lakes with a total storage capacity of approximately 580 billion gallons. The city's Watershed Protection Program is intended to maintain and enhance the high quality of these surface water sources. Review of the New York City Watershed Protection Program assesses the efficacy and future of New York City's watershed management activities. The report identifies program areas that may require future change or action, including continued efforts to address turbidity and responding to changes in reservoir water quality as a result of climate change. *Atlantic Rim Natural Gas Field Development Project*, 2006

Wakeman, Josiah D. Rich, 2021-09-13 This book is an invaluable reference for medical practitioners seeking to integrate opioid use disorder (OUD) treatment into general medical settings, including primary care, the inpatient hospital, and the emergency department. It recognizes opioid-related deaths in the United States as a significant public health crisis and fills the gap in drug use and addiction treatment knowledge for care providers. Timely and concise opening chapters examine the history of OUD, pharmacology, and treatment, as well as the principles of care and treatment. Subsequent chapters analyze the shortcomings of current approaches to opioid addiction, including the high cost and low value of acute care delivered by minimally trained providers and the fixation on short-term detoxification and rehab. The book offers specific guidance for practical integration of effective opioid use disorder treatment into a range of healthcare settings. Chapters also discuss the unique complexities of caring for special populations with OUD, such as pregnant people and those involved in the criminal legal system. The book concludes with personal experience from individuals with a history of OUD. Socially conscious and practical, *Treating Opioid Use Disorder in General Medical Settings* serves as a crucial evidence-based resource for physicians, nurse practitioners, physician assistants, nurses, and other healthcare professionals. Gordh, 1999-09-20 For many years the use of chemical agents such as pesticides and herbicides has been effective in controlling the many varieties of pests that infest both agricultural crops and backyard gardens However these pests are gradually becoming resistant to these agents because the agents themselves are acting as selective factors making the pests better and better able to resist and persist As a result the use of biological controlling agents is increasing This book is a comprehensive and authoritative handbook of biological control

Kroll, Ingrid Christoffels, Teresa Bajo, Research on bilingual language processing reveals an important role for control processes that enable bilinguals to negotiate the potential competition across their two languages The requirement for control that enables bilinguals to speak the intended language and to switch between languages has also been suggested to confer a set of cognitive consequences for executive function that extend beyond language to domain general cognitive skills Many recent studies have examined aspects of how cognitive control is manifest during bilingual language processing how individual differences in cognitive resources influence second
