Conservation Drones Serge A. Wich, Lian Pin Koh, 2018-05-31 Increasing numbers of ecologists and conservation biologists have begun to explore the use of drone technology to obtain accurate and up to date data on the distribution and density of species as well as the threats to their habitats in their ongoing attempts to conserve and monitor biodiversity Conservation drones are low cost autonomous and operator friendly unmanned aerial vehicles that can be used for surveying mapping and monitoring both habitat and biodiversity They are fast becoming a valuable complement to ground based surveys and satellite imagery for a wide range of ecological and conservation applications The authors pioneered the use of conservation drones for the purpose of monitoring orangutan populations in Southeast Asia They subsequently founded ConservationDrones.org to share their knowledge of building and using drones with colleagues in the wider environmental community This website has proved highly popular and this book aims to further build capacity to use drones and inspire others to adapt emerging technologies for practical conservation

Moody's Manual of Railroads and Corporation Securities, 1920 *A Manual for Writers* John Matthews Manly, John Arthur Powell, 1913 **A Manual for Writers, Covering the Needs of Authors for Information on Rules of Writing and Practices in Printing** John Matthews Manly, John Arthur Powell, 1913 **Moody's Manual of Investments** John Sherman Porter, 1929 American government securities 1928 53 in 5 annual vols v 1 Railroad securities 1952 53 Transportation v 2 Industrial securities v 3 Public utility securities v 4 Government securities 1928 54 v 5 Banks insurance companies investment trusts real estate finance and credit companies 1928 54 **Man-Machine Interactions 2** Tadeusz Czachorski, Stanislaw Kozielski, Urszula Stanczyk, 2011-08-30 Man machine interaction is the interdisciplinary field focused on a human and a machine in conjunction It is the intersection of computer science behavioural sciences social psychology ergonomics security It encompasses study design implementation and evaluation of small and large scale interacting computing hardware and software systems dedicated for human use Man machine interaction builds on supportive knowledge from both sides the machine side providing techniques methods and technologies relevant for computer graphics visualisation programming environments the human side bringing elements of communication theory linguistics social sciences models of behaviour The discipline aims to improve ways in which machines and their users interact making hardware and software systems better adapted to user's needs more usable more receptive and optimised for desired properties This monograph is the second edition in the series providing the reader with a selection of high quality papers dedicated to current progress new developments and research trends in man machine interactions area In particular the topical subdivisions of this volume include human computer interfaces robot control and navigation systems bio data analysis and mining pattern recognition for medical applications sound text and image processing design and decision support rough and fuzzy systems crisp and fuzzy clustering prediction and regression algorithms and optimisation and data management systems
