

### Setting Out Details

This intersection treatment is for low volume conditions by virtue of rural conditions and road train operation.

Road Train, B—double, Prime Mover & Semi-Trailer: These have a satisfactory observation angle when stopped at the Give Way/Stop Line.

SU truck:

Will describe a larger turning radius than a road train. More difficult observation angle when stopped at the Give Way/Stop Line but low volumes and observation angle prior to the line means gap assessment is rarely a problem.

Cars: Will describe a much larger turning radius due to available space.

Position A — satisfactory observation angle provided no object blocks the sight line.

Position B — difficult observation angle but low volumes means gap assessment is rarely a problem.

Position C — satisfactory observation by mirror, aided by low volumes and assessment at previous positions.
