**Building Resilience in Sub-Saharan Africa's Fragile States** Mr.Enrique Gelbard,Corinne Deléchat,Ms.Ejona Fuli,Mr.Mumtaz Hussain,Mr.Ulrich Jacoby,Mrs.Dafina Glaser,Mr.Marco Pani,Mr.Gustavo Ramirez,Rui Xu,2015-06-25 This paper analyzes the persistence of fragility in some sub Saharan African states and the multiple dimensions of state weakness that are simultaneously at play This study also provides an overview of the analytics of fragility conflict and international engagement with fragile states before turning to an assessment of the current state of affairs and the areas in which there has been progress in building resilience The paper also looks at the role of fiscal policies and institutions and analyzes growth accelerations and decelerations Seven country case studies help identify more concretely some key factors at play and the diversity of paths followed with an emphasis on the sequencing of reforms The paper concludes with a summary of the main findings and policy implications

**Exiting From Fragility in sub-Saharan Africa** Corinne Deléchat,Ms.Ejona Fuli,Mrs.Dafina Glaser,Mr.Gustavo Ramirez,Rui Xu,2015-12-22 This paper studies the role of fiscal policies and institutions in building resilience in sub Saharan African countries during 1990 2013 with specific emphasis on a group of twenty six countries that were deemed fragile in the 1990s As the drivers of fragility and resilience are closely intertwined we use GMM estimation as well as a probabilistic framework to address endogeneity and reverse causality We find that fiscal institutions and fiscal space namely the capacity to raise tax revenue and contain current spending as well as lower military spending and to some extent higher social expenditure are significantly and fairly robustly associated with building resilience Similar conclusions arise from a study of the progression of a group of seven out of the twenty six sub Saharan African countries that managed to build resilience after years of civil unrest and or violent conflict These findings suggest relatively high returns to focusing on building sound fiscal institutions in fragile states The international community can help this process through policy advice technical assistance and training on tax administration and budget reforms

**Property Threats and the Politics of Anti-Statism** Gabriel Ondetti, 2021-01-28 Tax revenues have risen robustly across Latin America in recent decades casting doubt on the region's reputation for having states too poor to finance economic and social development However dramatic differences persist in the magnitude of national tax burdens and public sector size even among seemingly similar countries This book examines the historical roots of this variation Through in depth case studies of Argentina Brazil Chile and Mexico as well as

evidence from Ecuador and Guatemala Ondetti reveals the lasting impact of historical episodes of redistributive reform that threatened property rights Ironically where such episodes were most extensive they hindered future taxation by prompting economic elites and social conservatives to mobilize politically against state intervention forming peak business associations rightist parties and other formal and informal organizations that have proven to be remarkably enduring **Mergent ...
